

GoCloud: Streamlined Azure Landing Zone Implementation

Overview

Transform your Azure environment with GoCloud, a proven, efficient approach to creating enterprise-grade Azure Landing Zones. Developed by Fusion5, GoCloud accelerates deployment, enhances governance, and ensures your cloud infrastructure aligns with Microsoft best practices.

Whether you're migrating workloads, adopting AI, or scaling your business operations, GoCloud lays the foundation for secure, scalable, and well-governed cloud environments.

Key features

- **Accelerated Deployment:** Save months of effort with our pre-configured architecture, leveraging Infrastructure as Code (Terraform) for rapid deployment.
- **Enhanced Governance:** Mitigate risks with robust guardrails, preventing costly errors and ensuring compliance.
- **Scalable Infrastructure:** Establish a hub-spoke network design with secure on-premises connectivity, built for high availability and future growth.

Service tiers

Feature	Standard Tier
Deployment	One-off deployment of 600+ Azure resources using Terraform
Terraform Code Rights	No rights to Terraform source code
Design Modifications	Standardised design document
Networking	Hub-spoke architecture with Azure Firewall, VPN, or ExpressRoute
High Availability (HA)	Two Availability Zones for HA
Workshops	Cloud Adoption Framework and Networking/Architecture workshops
Documentation	Standard design document
Administrative Model	Centralised IT team
Customisation	Limited customisation (fixed resources and design templates)
Exclusions	<ul style="list-style-type: none">• CI/CD via Azure Pipelines / GitHub Actions.• Access to the GoCloud Terraform source code.• Regional HA or DR.• Major deviations from our standard design document.

Pricing

Fusion5's GoCloud **Standard Tier** is available at a fixed price of **\$18,500 AUD**, offering exceptional value for a streamlined, best-practice Azure Landing Zone implementation. This pricing includes all essential features to establish a secure, scalable, and well-governed cloud environment.

Pricing is subject to the scope and terms outlined in the Standard Tier package.

Exclusions:

- CI/CD via Azure Pipelines / GitHub Actions.
 - Access to the GoCloud Terraform source code.
 - Regional HA or DR.
 - Major deviations from our standard design document.
 - Azure Virtual WAN.
 - Workload migrations to Azure.
-

Why choose GoCloud?

- **Fast-track Deployment:** Move quickly with a standardised, best-practice framework.
 - **Strengthened Security:** Gain peace of mind with tightly governed cloud environments.
 - **Operational Excellence:** Build a cloud platform ready for innovation and growth.
-

Get started

Contact Fusion5 today to learn how GoCloud can transform your Azure infrastructure. Ready to go live? Let GoCloud take the complexity out of cloud adoption.

GoCloud: A name that embodies excellence in the Cloud

*At its core, **GoCloud** is about enabling organisations to move confidently and seamlessly into the cloud. The name evokes action, momentum, and progress—qualities that are essential for any business embracing digital transformation. It's a call to action: "**Go Cloud. Go Further. Go Better. Go Beyond.**"*

*For Fusion5's Cloud Centre of Excellence, **GoCloud** represents our commitment to delivering best-practice, secure, and scalable cloud solutions. It encapsulates our belief in simplicity without compromising power, enabling organisations to unlock the full potential of the cloud with minimal friction.*
