# FUSION5: YOUR PARTNER FOR COPILOT ADOPTION AND TRAINING

Learn how we can help you get the most out of Copilot, enabling your organisation to securely turn words into the most powerful productivity tool on the planet.

Microsoft Copilots offer the potential to genuinely revolutionise the way we work to inspire us to be more productive and focus on meaningful work. Whether you want to create a proposal based on a rough outline or automatically build a presentation on a specific topic, copilot can help.
However, if staff do not use Copilot, or use it not how you intended, efforts will not yield desired results for investment.
Effective change in behaviour is necessary to drive end-user adoption.

Copilot adoption success

WORKSHOP

Define the Copilot application for your organisation. Define compelling benefits and your rationale for introducing Copilot. Structure how to measure success and ensure a seamless change management and implementation process.

COLLATERAL

Gain access to our exclusive branded training collateral for Microsoft Copilot, covering Teams, Outlook, PowerPoint, and Word. Elevate your training sessions with user guides, facilitator guides, and meticulously crafted session plans, ensuring a seamless learning experience for all participants.

CAPABILITY

Empower your team with tailored sessions focused on building internal capability in resistance management, training delivery, and driving adoption.

DELIVERY

Need more support? From delivering training to coaching leaders in change management and adoption, we're here to ensure your organisation's success. Let us measure usage and provide ongoing guidance to drive impactful outcomes for your team.

How can we help you?

Building a Ready, Willing, and Able Organisation for Copilot Adoption: This involves creating an environment within your organisation where employees are not only equipped with the necessary resources but are also motivated and prepared to embrace the use of Copilot effectively. This will include crafting a change, post go live and learning plans, conducting readiness assessments, addressing any barriers to adoption, and setting a culture of continuous learning and innovation.

Training on Copilot Features, Scenarios and Best Practices: It's crucial to provide comprehensive training to your employees on how to utilise Copilot's features and functionalities effectively. This

training will be tailored to your organisation's specific needs and scenarios, ensuring that employees understand how to leverage Copilot to enhance their productivity, collaboration, and decision-making processes. Additionally, incorporating best practices into the training can help optimise the use of Copilot and maximise its benefits for your organisation.

Monitoring and Measuring Copilot Usage and Performance: Regularly monitoring and measuring the usage and performance of Copilot within your organisation is essential for gauging its effectiveness and identifying areas for improvement. This may involve tracking metrics such as user engagement, adoption rates, and overall user satisfaction. Based on the data collected, we will provide feedback, identify areas of success, and make recommendations for optimising Copilot usage to better align with your organisational goals and objectives.

Overall, by focusing on building readiness, providing comprehensive training, and continuously monitoring and optimising Copilot usage, you can ensure that your organisation fully embraces and leverages this tool to drive productivity, efficiency, and success.
