

Dynamics 365 Finance & Operations **Power BI** enablement

Get the most out of your Dynamics 365 Finance & Operations reporting by activating the standard Power BI content packs and customising Power BI to meet your business needs.

Power BI, Microsoft's powerful business intelligence platform, allows organisations to unify self-service and enterprise analytics and meet self-service and enterprise data analytics needs on a single platform. Microsoft Dynamics 365 F&O Power BI content packs are built into the F&O environment and enables rich reporting from within your ERP application.

In addition; Combine data from across your organisation and surface dashboards and insights to team members via mobile devices and their browser – as well as to customers through your customer portal should you so desire.

Get self-service analytics at enterprise scale

Reduce the added cost, complexity, and security risks of multiple solutions with an analytics platform that scales from individuals to the organisation.

Use smart tools for strong results

Find and share meaningful insights with hundreds of data visualisations, built-in AI capabilities, tight Excel integration, and prebuilt and custom data connectors.

Help protect your analytics data

Gain leading sensitivity classification and data loss prevention capabilities to help keep your data secure and compliant—even when it's exported.

Dynamics 365 for Finance and Operations has evolved into purpose-built applications to help you manage specific business functions. For Finance and Operations users of Power BI, you can now pin tiles, dashboards, and reports from your own Power BI accounts to application workspace.

Fusion5 offers a Power BI Readiness assessment for Dynamics 365 Finance & Operations clients, which includes:

- Facilitation to activate all Microsoft standard Power BI content packs for Dynamics F&O in the customers environment if not active already
- Evaluation of client's Power BI knowledge and experience
- Facilitation of a workshop to understand the reporting requirements and identify gaps between standard content packs and the reporting needs
- Explanation of licensing options for Power BI in relation to complexity of requirements and gaps between requirements and standard content packs
- Basic Power BI usage training
- Optional 2 days of report customisation

For more information on the Fusion5 Power BI readiness assessment for Dynamics 365 Finance & Operations, or to see if this solution is right for you, please contact us.
