

# NetSuite SRP

## Power BI report starter pack

Get the right resource allocation, utilisation and forecasting from your system with the Fusion5 & NetSuite SRP Power BI report starter pack to fast track the reporting you need from NetSuite.

Power BI, Microsoft's powerful business intelligence platform, allows organisations to unify self-service and enterprise analytics and meet self-service and enterprise data analytics needs on a single platform. Combine data from across your organisation and surface dashboards and insights to team members directly in NetSuite or via mobile devices and their browser – as well as to customers through your customer portal should you so desire.

### Get self-service analytics at enterprise scale

Reduce the added cost, complexity, and security risks of multiple solutions with an analytics platform that scales from individuals to the organisation.

### Use smart tools for strong results

Find and share meaningful insights with hundreds of data visualisations, built-in AI capabilities, tight Excel integration, and prebuilt and custom data connectors.

### Help protect your analytics data

Gain leading sensitivity classification and data loss prevention capabilities to help keep your data secure and compliant—even when it's exported.

To get your NetSuite data integrated in Power BI along with your other data sources (i.e. Google, Salesforce) with pre-built reports that let you hit the ground running, Fusion5 has developed the Power BI pack for NetSuite customers.

This includes:

- Downloadable Power BI starter pack with instructions for a rapid start to enable your NetSuite data with PowerBI Reporting
- Detailed documentation to configure NetSuite to work with the starter pack
- Detailed documentation to install the starter pack and get going with Power BI
- Optional Power BI readiness assessment, Power BI training, starter pack implementation, configuration report customisation services are available on request
