

# RapidStart - Data Proof of Concept

Are you keen to make the move from your on-premise Dynamics AX2012 system to Dynamics 365 Finance & Operations but don't know where to start?

This 5 day proof-of-concept will show you what your data could look like as well as quantifying the time, effort and cost required to move to the cloud.

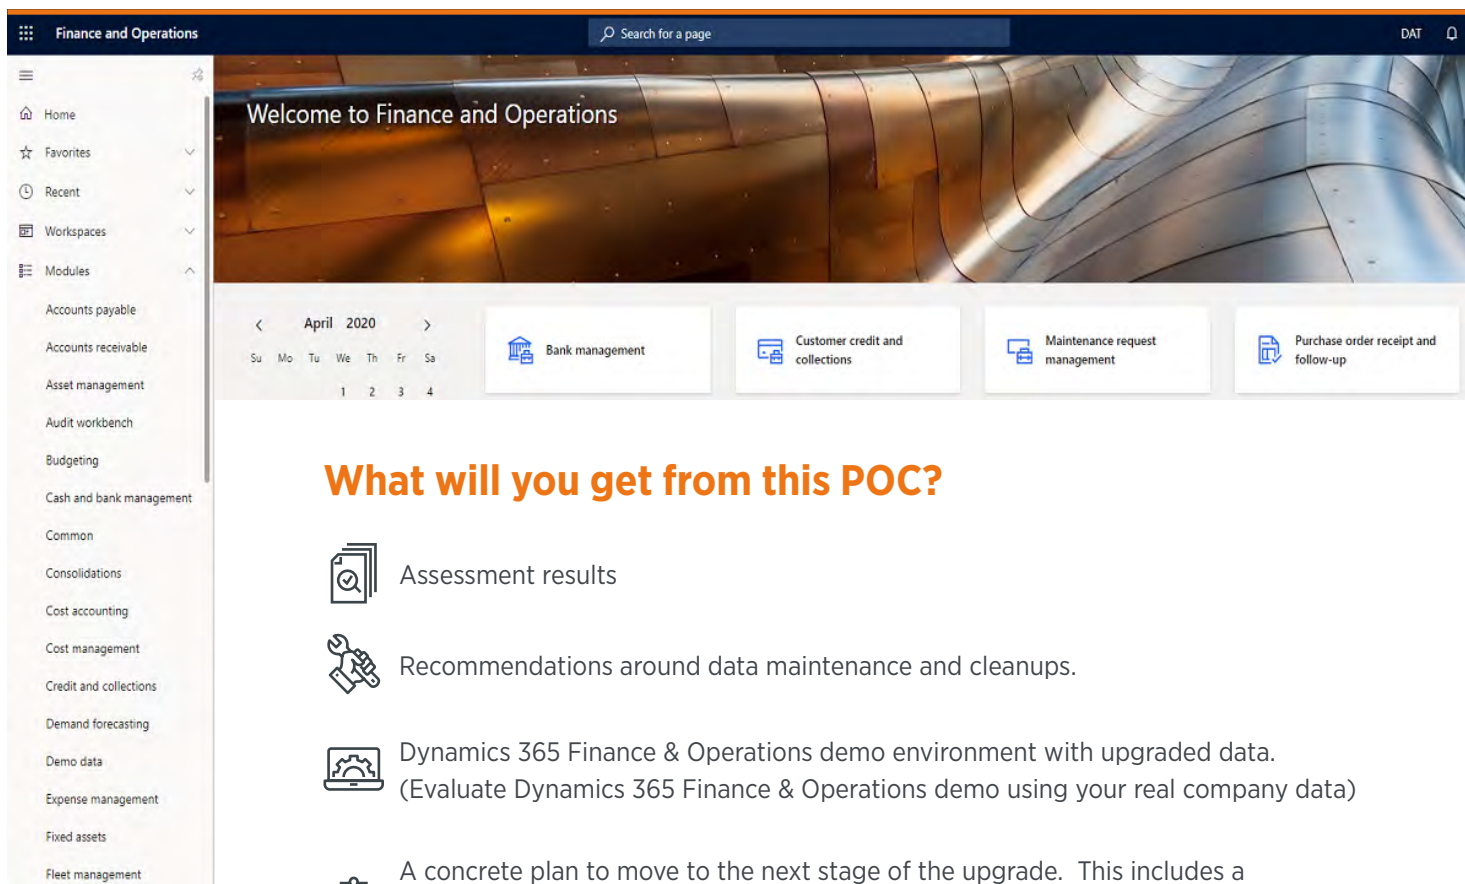

You've made the decision to move to Dynamics 365 Finance & Operations. However, you want to review your existing modifications against the way your business works today and to see how your system could look in Dynamics 365 Finance & Operations.

Moving to Dynamics 365 Finance & Operations is a big investment, and making the right move is critical.

We understand that businesses do change dramatically as they grow, which means systems initially implemented with what may have been considered critical features at the time are no longer important to the business.

As part of the AX upgrade progress, we find that that our customers want to adopt an out of the box and best practice approach to make the most of their Dynamics 365 Finance & Operations investment and to take advantage of any new features as part of the continuous upgrade process twice a year to have their investment remain relevant.

In one week, Fusion5 will assess the data readiness of your existing Dynamics AX environment and perform a data migration on your current Microsoft Dynamics AX2012 system (excluding existing customisations). You will be able to take a 'clean slate' approach and be able to evaluate whether your existing modifications are still required.

## What will you get from this POC?

Assessment results

Recommendations around data maintenance and cleanups.

Dynamics 365 Finance & Operations demo environment with upgraded data.  
 (Evaluate Dynamics 365 Finance & Operations demo using your real company data)

A concrete plan to move to the next stage of the upgrade. This includes a review of your existing modifications and whether they can be replaced with standard configuration.

## Act now

Fusion5 can provide you with an easy, and manageable, process for migrating your AX on premise system to Dynamics 365 Finance & Operations.

# We are Fusion5

Fusion5 provides business solutions that add real commercial value to your organisation. Our focus is on making potential reality for our customers, and our people.

When we work with you, we don't recommend technology for technology's sake. What drives us is delivering outcomes that genuinely improve your business. Our unique experience and advanced understanding of the solutions we offer, together with innovative technology that can be wrapped around them, means we can offer 'fit for you' solutions that amplify solution benefits for your business.

We realise adopting new technology is not just a one-off activity - it requires change management, support, and continuous improvement to ensure your digital journey evolves with your business. We're here to partner with you through all aspects of the journey.
