

# Power Platform Education Program

Powerful alone. Better together.

## Microsoft Power Platform

To respond to the growing demand for digital solutions, organisations are increasingly looking for ways to drive accelerated app innovation.

Low-code platforms like Microsoft Power Platform help IT professionals move faster through collaboration with the business, allowing them to deliver more solutions with greater efficiency, security, and compliance.

The Microsoft Power Platform is an easily accessible tool that can foster innovation across your organisation. It enables your people to better analyse data, build solutions, automate processes and create virtual agents.

However, despite being easy to use, most businesses suffer from a failure to launch because they struggle to dedicate the time and focus needed to get up and running.

## Power Platform Team Workshop

The Power Platform Team Workshop from Fusion5 is a focused educational programme for your business and IT team on the Power Platform from Microsoft, identifying highest-value opportunities where a Power Platform will benefit your company, and enabling you to create innovative, value-adding applications specific to your business needs faster.

Attendees will walk away with the knowledge they need to leverage the solution within your organisation to improve efficiency and remove technical debt.

Over the course of several hands-on sessions, we work with specific examples from within your business and help you find where Power Platform can streamline and automate processes. We then guide you through building a proof of concept you can start implementing right away.

### For example:

-  **Improve your decision-making with Power BI**  
Make informed, confident business decisions by putting data-driven, real-time insights into your hands.
-  **Solve problems creatively with Power Apps**  
Turn ideas into organisational solutions by building custom apps that solve business challenges
-  **Promote efficiency with Power Automate**  
Boost business productivity and minimise manual tasks by automating organisational processes
-  **Ramp up your service with Power Virtual Agents**  
Easily build chatbots to engage conversationally with your customers and employees – no coding required!

## Education Program
