

# Microsoft Power Platform for Education – Team Workshop

**Empower innovation in your faculty and staff**

## Microsoft Power Platform

To respond to the growing demand for digital solutions, the education sector is increasingly looking for ways to drive accelerated app innovation.

Low-code platforms like Microsoft Power Platform help IT professionals move faster through collaboration with relevant faculties and administration arms, allowing them to deliver more solutions with greater efficiency, security, and compliance.

The Microsoft Power Platform is an easily accessible tool that can foster innovation across your School. It enables your teachers and staff to better analyse data, build solutions, automate processes and connect in new and innovative ways with their students and parents.

However, despite being easy to use, most businesses and Schools we have worked with have suffered from a failure to launch because they struggle to dedicate the time and focus needed to get up and running – Which is where we can assist.

## Power Platform Team Workshop

The Power Platform Team Workshop from Fusion5 is a focused educational programme for your IT team and faculty members on the Power Platform from Microsoft, identifying highest-value opportunities where a Power Platform will benefit your School, and enabling you to create innovative, value-adding applications specific to your student, parent and staff needs faster.

Attendees will walk away with the knowledge they need to leverage the solution within your School to improve efficiency and remove technical debt. Over the course of hands-on sessions, we work with specific examples from within your School and help you find where Power Platform can streamline and automate processes. We then guide you through building a proof of concept you can start implementing right away.

**Some specific examples we have made within the Education sector include:**

- Event Management for both Incursions and Excursions (with consent from the parent on the portal)
- Digitise forms
- Simplified check-in Apps at reception
- Automate approval processes
- Increased insights into your student behavior with real-time dashboards
- Online portal solutions to improve the customer experience with parents and students
- Online Medical Plans to alert Parents if they have expired or are expiring
- Integration with Synergetic

## 3 day Education program agenda

### Overview

- Introduction to Power Platform Components Introduction to Governance with the Power Platform
- ALM (Application Lifecycle Management)
- DLP (Data Loss Prevention)
- Walkthrough of Microsoft's Centre of Excellence solution

This workshop offers your School a low-cost entry to accessing new technology and new ideas and you may be eligible for assistance from Microsoft to cover the costs. We'll support you at every step of the way and, best of all, you will walk away with a tangible, value-adding solution that is ready to deploy.
