Azure AI services

This workshop will give your team comprehensive introduction and an overview of AI services available today on Azure.

The workshop participation model is virtual by default through Microsoft Teams, but can be arranged in-classroom at selected locations. Target audience - business and technical decision makers. Recommended amount of participants - up to ten.

During the workshop following Azure services will be covered, including live demonstrations and use case scenarios:

- Azure Machine Learning platform;
- Azure Cognitive Services: OpenAI Service, Vision, Speech, Language, Decision;
- Azure Applied AI Services: Cognitive Search, Form Recognizer, Bot Service, Video Indexer, Metrics Advisor, Immersive Reader.
