OpenAI services on Azure

This workshop is designed to inspire your team and give a solid overview of OpenAI services available today on Azure. The workshop participation model is virtual by default through Microsoft Teams, but can be arranged in-classroom in selected locations.

The agenda and difficulty level of technical content is depending on attending audience. It can be adopted to the following target audiences: Business Decision Makers, Technical Decision Makers, CIO/CMO, Data Scientists, Developers. Recommended number of participants: up to 10.

During the workshop participants will learn about following topics:

- Use cases for large-scale pretrained OpenAI models such as writing assistance, code generation, and reasoning over data.
- Technical overview of OpenAI services on Azure, available models and customization capabilities.
- Responsible AI principles and practices applied to OpenAI services on Azure
