

Web Applications Development and Modernization: 3 Month Implementation Project

Modernize your web applications with Azure's robust suite of tools. Our service includes migrating legacy applications to Azure App Service or other managed services, enhancing performance and scalability. We utilize managed data storage solutions, like Azure SQL Database for data storage and Azure Front Door for global load balancing and high availability. Our modernization approach ensures your web applications are secure, efficient, and future-proof.

We emphasize iterative transformation, allowing you to prioritize high-impact features and upgrades without overcommitting resources upfront. By leveraging cloud-native services, we enable fast deployment cycles and simplified operations.

To support long-term success, we also offer training and co-creation workshops with your internal teams, ensuring knowledge transfer and internal capability growth alongside the technical improvements.

futurice

We are Futurice – an outcome-focused digital transformation company, empowering the world to act.

WITH THE POWER OF

People

...who always strive for improvement because they are the ones who truly care to make a difference.

Technology

WE ARE

Innovators, builders and change agents

In times of profound changes across markets and business environments, organizations find themselves in fundamental transformations. It has become crucial for them to learn how to operate in this increasingly uncertain world that could look different by tomorrow.

As experts in digital transformation, we focus on digital impact that enables sustainable growth and builds systemic resilience. We strive to shape the next generation of customer experiences, business models and operating models for our clients, and deliver measurable outcomes that positively affect their businesses, industries, and society at large.

OUR GLOBAL OFFERINGS

Strategy and Renewal

Providing people-centric strategic consulting with data & AI and empowering you to boost impact, improve productivity, engage employees, and satisfy customers.

Digital Solutions

Transforming customer engagement, elevating operational efficiency, and developing data-driven digital solutions that align with your business needs.

Managed Services

Taking care of the applications, platforms and managed services in your digital portfolio to ensure they help you create a lasting business impact.
