

Data Platform Development and Modernization: 3 Months Implementation Project

Build and modernize your data platform on Azure utilizing Azure Fabric for unified data integration and analytics, Azure Data Factory for automated data pipelines, Azure Databricks for advanced big data analytics, and Azure Cosmos DB for globally distributed, low-latency databases. We design and deploy comprehensive data solutions, including real-time streaming architectures and batch processing systems tailored to organizational needs.

Deliverables include a fully configured Azure data platform, data pipeline documentation, data model blueprints, and access to detailed operational dashboards. Outcomes encompass improved data accessibility, enhanced data processing speeds, and the ability to extract deeper insights for strategic decision-making. We ensure that your data platform supports both strategic and operational needs, enabling you to leverage data for competitive advantage.

We establish robust governance frameworks, implementing metadata management, data lineage tracking, and quality control measures from the outset, ensuring data integrity and compliance. Expect a secure, scalable, and cost-optimized data environment that supports complex analytics and provides a single source of truth for your organization. Training sessions and handover documentation will be provided to ensure smooth operational transitions.

For organizations looking to modernize their legacy data platforms, we provide a seamless migration to Azure, minimizing downtime and ensuring data consistency. Deliverables for modernization include a detailed migration roadmap, compatibility assessments, refactored legacy pipelines for Azure, and cost-performance optimization analysis. Also, Azure-native tools integration, post-migration validation reports, and tailored support to ensure a smooth transition and alignment with cloud-native best practices.

We are Futurice – an outcome-focused digital transformation company, empowering the world to act.

WITH THE POWER OF

People

...who always strive for improvement because they are the ones who truly care to make a difference.

Technology

...that helps us overcome the challenges of tomorrow and empowers us to create sustainable economies and societies of today.

Creativity

...that helps us to think differently and create something new.

WE ARE

Innovators, builders and change agents

In times of profound changes across markets and business environments, organizations find themselves in fundamental transformations. It has become crucial for them to learn how to operate in this increasingly uncertain world that could look different by tomorrow.

As experts in digital transformation, we focus on digital impact that enables sustainable growth and builds systemic resilience. We strive to shape the next generation of customer experiences, business models and operating models for our clients, and deliver measurable outcomes that positively affect their businesses, industries, and society at large.

OUR GLOBAL OFFERINGS

Strategy and Renewal

Providing people-centric strategic consulting with data & AI and empowering you to boost impact, improve productivity, engage employees, and satisfy customers.

Digital Solutions

Transforming customer engagement, elevating operational efficiency, and developing data-driven digital solutions that align with your business needs.

Managed Services

Taking care of the applications, platforms and managed services in your digital portfolio to ensure they help you create a lasting business impact.
