

## Azure Well-Architected Assessment: 1 Month Assessment Project

Ensure your Azure architecture is optimized for performance, security, cost and sustainability with our Well-Architected Assessment. Our certified experts conduct a thorough review of your Azure environment, following the Azure Well-Architected Framework. We provide actionable recommendations to enhance your cloud infrastructure, leveraging tools like Azure Advisor and Azure Security Center.

This assessment delivers clarity by mapping existing resources to business goals and identifying gaps that may limit growth or resilience. It's a structured way to evaluate and prioritize improvements without adding technical debt.

We also provide strategic guidance on how to evolve your architecture incrementally. Whether you are planning for new services, regulatory changes, or just want to improve baseline performance, we'll help you make informed decisions.

WE ARE

# Innovators, builders and change agents

In times of profound changes across markets and business environments, organizations find themselves in fundamental transformations. It has become crucial for them to learn how to operate in this increasingly uncertain world that could look different by tomorrow.

As experts in digital transformation, we focus on digital impact that enables sustainable growth and builds systemic resilience. We strive to shape the next generation of customer experiences, business models and operating models for our clients, and deliver measurable outcomes that positively affect their businesses, industries, and society at large.

## OUR GLOBAL OFFERINGS

### Strategy and Renewal

Providing people-centric strategic consulting with data & AI and empowering you to boost impact, improve productivity, engage employees, and satisfy customers.

### Digital Solutions

Transforming customer engagement, elevating operational efficiency, and developing data-driven digital solutions that align with your business needs.

### Managed Services

Taking care of the applications, platforms and managed services in your digital portfolio to ensure they help you create a lasting business impact.
