

AI Proof of Concept (PoC): 1 Month Implementation Project

Kickstart your AI initiatives with an Azure AI Proof of Concept. Our offering includes developing and deploying AI models using Azure Machine Learning and integrating Azure OpenAI Service for generative AI capabilities. We provide a tangible demonstration of AI's potential to transform your business operations.

A well-scoped PoC focuses on a clear business problem and delivers measurable results within a short timeframe. This helps build stakeholder buy-in and define a roadmap for broader AI adoption.

We also ensure explainability and responsible AI practices are considered from the start. This lays the foundation for ethical, secure, and business-aligned AI deployments in the future.

Deliverables: you will receive a documented solution architecture, a functioning prototype deployed in your Azure environment, and a technical report summarizing insights, model performance, and identified business value. We also provide guidance on scaling the solution, including key next steps toward production readiness.

futurice

We are Futurice – an outcome-focused digital transformation company, empowering the world to act.

WITH THE POWER OF

People

...who always strive for improvement because they are the ones who truly care to make a difference.

Technology

WE ARE

Innovators, builders and change agents

In times of profound changes across markets and business environments, organizations find themselves in fundamental transformations. It has become crucial for them to learn how to operate in this increasingly uncertain world that could look different by tomorrow.

As experts in digital transformation, we focus on digital impact that enables sustainable growth and builds systemic resilience. We strive to shape the next generation of customer experiences, business models and operating models for our clients, and deliver measurable outcomes that positively affect their businesses, industries, and society at large.

OUR GLOBAL OFFERINGS
