

## Landing zone design and implementation: 3 Months Implementation Project

Enforce best practices and proper management structure in your new or existing Azure environment. Establish robust best practices and a well-defined management structure for your Azure environment, whether it's a new deployment or an existing infrastructure. This includes implementing comprehensive governance policies, defining clear roles and responsibilities for resource management and security, and establishing standardized operational procedures. A well-managed Azure environment ensures cost optimization, enhanced security posture, improved resource utilization, and streamlined compliance efforts. This proactive approach minimizes potential risks, facilitates scalability, and promotes long-term sustainability of your cloud infrastructure.

Deliverables for Landing Zone design and implementation include a fully configured Azure landing zone environment, detailed documentation of governance policies and operational procedures, Infrastructure-as-Code templates, and training sessions for team onboarding. We tailor the landing zone to reflect your organizational structure, security model, and compliance needs, ensuring alignment with both technical and business goals.

Through automation and Infrastructure-as-Code, we reduce manual configuration errors and promote consistency. This helps your teams onboard new projects quickly, securely, and with minimal friction. This offering ensures a solid foundation for your Azure deployments, facilitating efficient management and future growth.

We are Futurice – an outcome-focused digital transformation company, empowering the world to act.

WITH THE POWER OF

## People

...who always strive for improvement because they are the ones who truly care to make a difference.

## Technology

...that helps us overcome the challenges of tomorrow and empowers us to create sustainable economies and societies of today.

## Creativity

...that helps us to think differently and create something new.

WE ARE

# Innovators, builders and change agents

In times of profound changes across markets and business environments, organizations find themselves in fundamental transformations. It has become crucial for them to learn how to operate in this increasingly uncertain world that could look different by tomorrow.

As experts in digital transformation, we focus on digital impact that enables sustainable growth and builds systemic resilience. We strive to shape the next generation of customer experiences, business models and operating models for our clients, and deliver measurable outcomes that positively affect their businesses, industries, and society at large.

## OUR GLOBAL OFFERINGS

### Strategy and Renewal

Providing people-centric strategic consulting with data & AI and empowering you to boost impact, improve productivity, engage employees, and satisfy customers.

### Digital Solutions

Transforming customer engagement, elevating operational efficiency, and developing data-driven digital solutions that align with your business needs.

### Managed Services

Taking care of the applications, platforms and managed services in your digital portfolio to ensure they help you create a lasting business impact.
