

Custom Business Application Development: 4-Month Implementation

Our end-to-end service transforms complex operational challenges into streamlined, intelligent, and scalable digital solutions. Our team designs, builds, and deploys bespoke enterprise applications using Microsoft Power Platform, Dynamics 365, and Azure, specializing in deep integration with existing systems and superior user experience. We address:

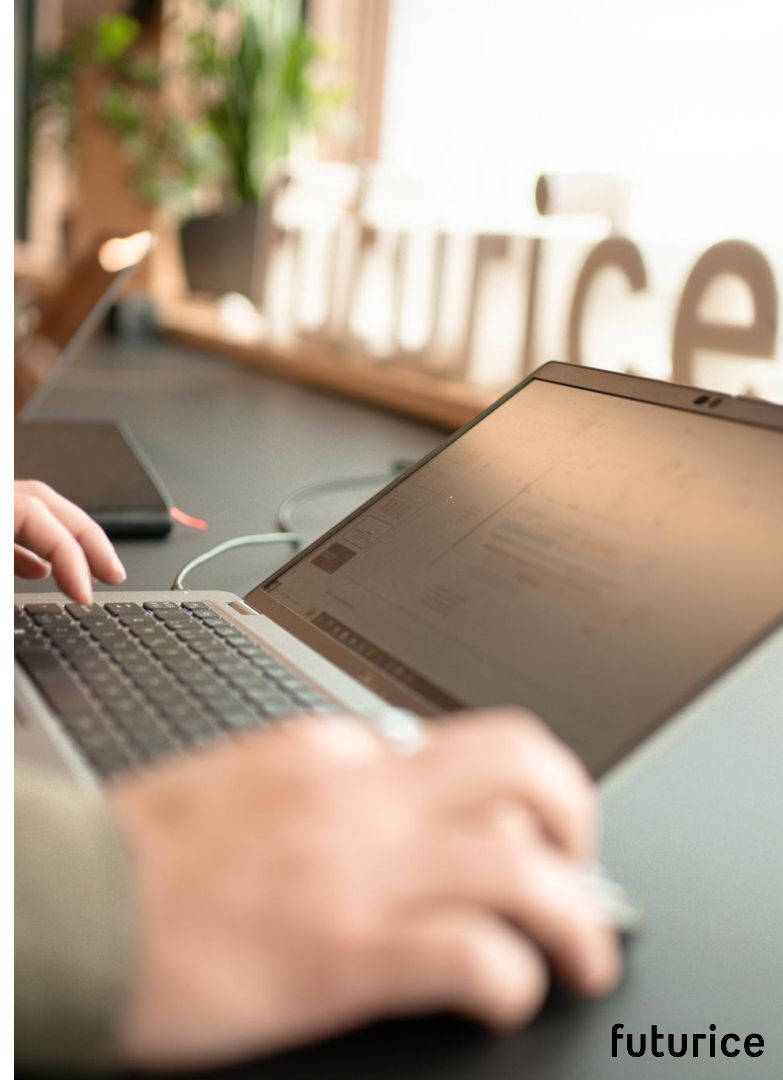

- Inefficient manual workflows, paper forms, or disparate spreadsheets.
- Reliance on outdated or unsupported legacy systems creating technical debt.
- Need for custom solutions integrating with core enterprise systems (e.g., SAP, Salesforce).
- Off-the-shelf software failing to meet unique business needs.

Scope:

- Month 1: Design & Architecture: Service design workshops, UX/UI prototypes, data model, and solution architecture.
- Months 2-3: Agile Development: Agile sprints for Power App, Dynamics 365, or Power Pages portal; business logic, automation, and system integrations.
- Month 4: Testing, Deployment & Handover: User Acceptance Testing (UAT), production deployment, comprehensive documentation, and training.

Deliverables:

- Production-ready business application.
- Complete documentation (technical architecture, user guides, admin manuals).
- User training.

We are Futurice – an outcome-focused digital transformation company, empowering the world to act.

WITH THE POWER OF

People

...who always strive for improvement because they are the ones who truly care to make a difference.

Technology

...that helps us overcome the challenges of tomorrow and empowers us to create sustainable economies and societies of today.

WE ARE

Innovators, builders and change agents

In times of profound changes across markets and business environments, organizations find themselves in fundamental transformations. It has become crucial for them to learn how to operate in this increasingly uncertain world that could look different by tomorrow.

As experts in digital transformation, we focus on digital impact that enables sustainable growth and builds systemic resilience. We strive to shape the next generation of customer experiences, business models and operating models for our clients, and deliver measurable outcomes that positively affect their businesses, industries, and society at large.

OUR GLOBAL OFFERINGS

Strategy and Renewal

Providing people-centric strategic consulting with data & AI and empowering you to boost impact, improve productivity, engage employees, and satisfy customers.

Digital Solutions

Transforming customer engagement, elevating operational efficiency, and developing data-driven digital solutions that align with your business needs.

Managed Services

Taking care of the applications, platforms and managed services in your digital portfolio to ensure they help you create a lasting business impact.
