

Intelligent Process Automation: 8-Week Implementation

Our implementation digitizes and automates core business processes using Power Automate, AI Builder, and Copilots. We eliminate repetitive manual tasks, reduce human error, and integrate AI for complex scenarios like document processing, freeing your team for strategic work. We address:

- High operational costs and inefficiencies from manual workflows.
- Disconnected systems leading to data errors and delays.
- Long cycle times for critical business processes.
- Lack of in-house expertise for AI-driven automation.

Scope:

- Weeks 1-2: Process Discovery & Opportunity Analysis: Collaborate with process owners, conduct Value Stream Mapping, identify bottlenecks.
- Weeks 3-6: Automation Development & AI Integration: Develop flows, train AI Builder models, and create Copilot Studio conversational interfaces.
- Weeks 7-8: Pilot, Deployment & Monitoring: Deploy pilot, monitor performance, refine, and execute full rollout with a future roadmap.

Deliverables:

- Automated Production Workflows.
- Quantifiable Impact Analysis.
- Future Automation Roadmap.

futurice

We are Futurice – an outcome-focused digital transformation company, empowering the world to act.

WITH THE POWER OF

People

...who always strive for improvement because they are the ones who truly care to make a difference.

Technology

...that helps us overcome the challenges of tomorrow and empowers us to create sustainable economies and societies of today.

Creativity

...that helps us to think differently and create something new.

WE ARE

Innovators, builders and change agents

In times of profound changes across markets and business environments, organizations find themselves in fundamental transformations. It has become crucial for them to learn how to operate in this increasingly uncertain world that could look different by tomorrow.

As experts in digital transformation, we focus on digital impact that enables sustainable growth and builds systemic resilience. We strive to shape the next generation of customer experiences, business models and operating models for our clients, and deliver measurable outcomes that positively affect their businesses, industries, and society at large.

OUR GLOBAL OFFERINGS

Strategy and Renewal

Providing people-centric strategic consulting with data & AI and empowering you to boost impact, improve productivity, engage employees, and satisfy customers.

Digital Solutions

Transforming customer engagement, elevating operational efficiency, and developing data-driven digital solutions that align with your business needs.

Managed Services

Taking care of the applications, platforms and managed services in your digital portfolio to ensure they help you create a lasting business impact.
