

Legacy System Modernization: 4-Week Assessment

Critical business functions often run on outdated tech, creating risks and hindering innovation. This assessment offers a clear path forward by analyzing your legacy applications and delivering a modernization plan for the secure, scalable Microsoft Power Platform. We address:

- Dependence on unsupported business-critical applications.
- High maintenance costs and lack of skilled resources.
- Poor user experience and no mobile access for legacy apps.
- Inability to integrate legacy data with modern cloud services.

Scope:

- Week 1: Discovery & Triage: Inventory and categorize legacy applications; interview business owners on criticality and pain points.
- Week 2: Technical Analysis & Scoring: Deep-dive into high-priority app architecture; score suitability for Power Platform modernization.
- Week 3: Target State Architecture & Design: Design high-level Power Platform solutions for top candidates; identify optimal approach.
- Week 4: Roadmap & Business Case: Develop migration roadmap with estimates; create business case outlining costs, benefits, and ROI; present findings.

Deliverables:

- Comprehensive Modernization Report.
- Prioritized Migration Roadmap.
- Modernization Business Case.

futurice

We are Futurice – an outcome-focused digital transformation company, empowering the world to act.

WITH THE POWER OF

People

...who always strive for improvement because they are the ones who truly care to make a difference.

WE ARE

Innovators, builders and change agents

In times of profound changes across markets and business environments, organizations find themselves in fundamental transformations. It has become crucial for them to learn how to operate in this increasingly uncertain world that could look different by tomorrow.

As experts in digital transformation, we focus on digital impact that enables sustainable growth and builds systemic resilience. We strive to shape the next generation of customer experiences, business models and operating models for our clients, and deliver measurable outcomes that positively affect their businesses, industries, and society at large.

OUR GLOBAL OFFERINGS

Strategy and Renewal

Providing people-centric strategic consulting with data & AI and empowering you to boost impact, improve productivity, engage employees, and satisfy customers.

Digital Solutions

Transforming customer engagement, elevating operational efficiency, and developing data-driven digital solutions that align with your business needs.

Managed Services

Taking care of the applications, platforms and managed services in your digital portfolio to ensure they help you create a lasting business impact.
