Employee Experience & Viva Learning

Modern Work for us, in all its simplicity, means enabling a smooth working day for every employee. Viva Learning is a centralized learning hub in Microsoft Teams that lets you seamlessly integrate learning and building skills into your day. In Viva Learning, your team can discover, share, recommend, and learn from content libraries provided by both your organization and partners. They can do all of this without leaving Microsoft Teams.

Viva Learning makes it easy to create learning and growing opportunities for your organization without the need to step away from the communication tools you already use.

Organisational Learning Design Sprint

We combine service design methods and technology to discover future business objectives and the role of digital, modern work environment. We focus on concretizing the roles of the tools and providing inspiration of the possibilities of the Microsoft 365 environment for different user roles and needs. As a result, we create a roadmap that enhances organizational learning capabilities, communication and ultimately - employee experience.

Our approach is interactive and values concrete workshops and active communication throughout the project. Engaging stakeholders around the organisation enables us to uncover the current state of communication and collaboration and to validate and prioritise the challenges and solutions. We place high demands not only on ourselves but also our customers. Therefore, our work requires active participation in workshops, as well as the ability and willingness to make decisions.

The work consists of a 2-week design sprint, during which we proceed from a current state analysis to the determination of the roadmap for future steps towards organisational learning
