Fast and accurate cloud–based dictation

Experience unparalleled speed, precision, and reliability with AI speech technology

Dictate anytime, anywhere in any application

Are you searching for a dictation solution that is accessible anytime, anywhere, and fully customisable to your preferences? With **SpeechCursor**, you can dictate directly in any application, and have complete control over your user profile. Advanced AI speech technology ensures unparalleled speed and accuracy, even in less-than-ideal recording conditions. Download the application, log in, and you are ready to start!

Converting spoken messages to text in the cloud is effortless: place the cursor, press 'record' and start dictating. The text appears instantly on the screen. Make any necessary changes quickly with voice commands or through the keyboard. After approval, the text is immediately available in the patient record or another document of your choice.

G2 SPEECH

"

With SpeechCursor, you can rely on the highest quality speech-to-text to bring your notes to life.

"

Adaptable and scalable

SpeechCursor also grants you full control over your user profile, allowing you to create a personalised lexicon with new words, auto-texts, and data fields (jump points). This solution provides both individual users and specialists within larger organisations with complete freedom and autonomy when working in the cloud.

A cost-effective, AI-powered solution

Being a fully cloud-based solution, SpeechCursor brings substantial savings on installation costs related to infrastructure and application management. Automatic updates ensure you always have access to the latest features without incurring extra costs or effort.

SpeechCursor is powered by **Atlas**, our innovative speech recognition platform with Voice AI, based on Neural Networks and Deep Learning technologies. The platform seamlessly accommodates specialised medical terms and dialects, ensuring optimal recognition without the need for training. **Atlas** easily adjusts to your voice and accent, minimising disruptions, and external influences. With **SpeechCursor**, you can rely on the highest quality speech-to-text to bring your notes to life.

Low investment

As a cloud-based solution, **SpeechCursor** requires no investments in infrastructure and application management.
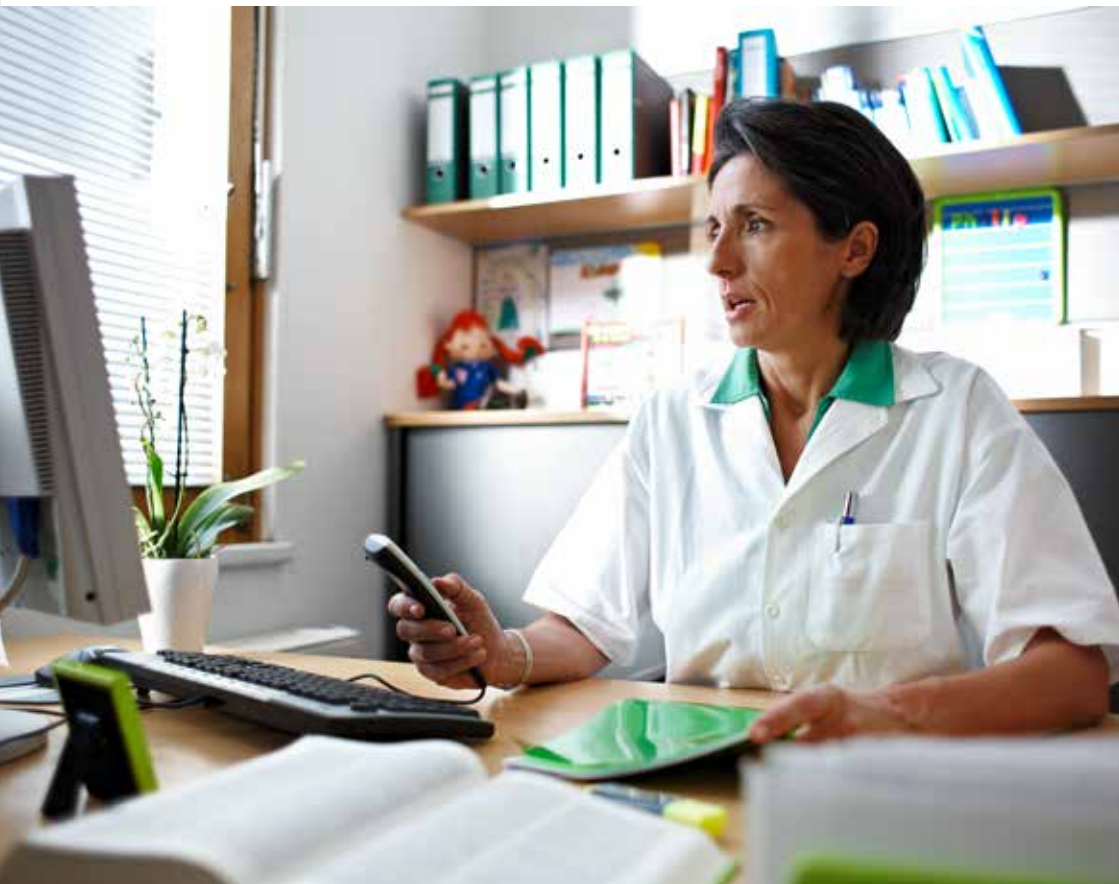

Quick and flexible

Quick and simple to get set up. Dictate and correct documents directly into any application, from any location.

Premium support

Seamless product integration and implementation backed by outstanding after-sales support.
