

POWER APPS DEVELOPMENT: 4 WEEKS POC (MVP)

Microsoft tools offer many possibilities for solving complex business challenges with low-code applications. In order to test those possibilities on real business scenarios in a short time - 4 weeks Proof of Concept (MVP) is your next step.

As a result of these 4 weeks, you will get: working Power Platform solution with custom your-branded UI that you can use to digitalize your business process and showcase it within your organization. In addition to that you will get an overview of Microsoft low-code tools and an understanding of how to apply these capabilities for your business automation.

Agenda:

Week 1:

- Kick-off meeting.
- Power Platform capabilities overview relevant to your case.
- Solution design.
- UI/UX design layout in Figma and architecture diagram demonstration.

Week 3:

- Solution design and customization.
- UI/UX design implementing.
- Second prototype demonstration with feedback gathering.
- Analyzing final scope and changes which can be implemented.

Week 2:

- Use-cases analysis.
- Solution design and customization.
- UI/UX design layout polishing.
- First prototype demonstration with feedback gathering.

Week 4:

- Solution design and customization finalization.
- Solution presentation.
- Documentation preparation.
- Providing end-user access to solution.
- Administrators and end-user training.

Deliverables:

- MVP of business application (mobile or desktop) in your environment.
- UI/UX design layout in Figma.
- Use-cases and user guide.
- Solution architecture diagram.
- Solution Roadmap and budget estimate (if applicable).
