

# POWER PLATFORM CoE ESTABLISHING: 6 MONTHS IMPLEMENTATION

The Center of Excellence (CoE) provides vital technologies to drive innovation, improvement, and advances within the Microsoft Power Platform in any organization. Whether you're just starting to learn about Power Platform or have already deployed numerous solutions it is vital to adopt all existing experience within your organization. From imbibing a 'develop your own' application culture, incepting a secure arena for application creation and overlooking the process through a governance lens while continuously ensuring policy compliance.

As a result of these 6 months, you will adopt Power Platform for your organization, and get clear view on how it might grow into a more mature investment with multiple functions and roles to manage multiple aspects of governance, training, support, and automated app deployment across the organization.

## Agenda:

### Month 1:

- Power Platform IT/security assessments and trainings
- CoE Toolkit implementation
