

The community-driven, cloud-based garage management system.

Workshop Management

Go paperless with our easy-to-follow process and a sleek home screen with required functions displayed; view and edit live diary and bookings, create checklists, and manage inventory stock from any device.

Autodata/Technical Data

The data can now be easily accessed by you and your techs through Desktop PCs, Tablets & Phones. The workshop application can be utilised in many documents and accessed by multiple users.

Accountancy Integrations

You have a choice between Garage Hive's own accountancy system Microsoft Dynamics 365 or several other integrations with Sage, Xero and Quickbooks.

Customised Reporting Platform

You have total control of what you want to see; however, you want to see it in the reporting suite. From day-to-day performance, important KPIs such as Average Invoice Value, Gross Profit and more.

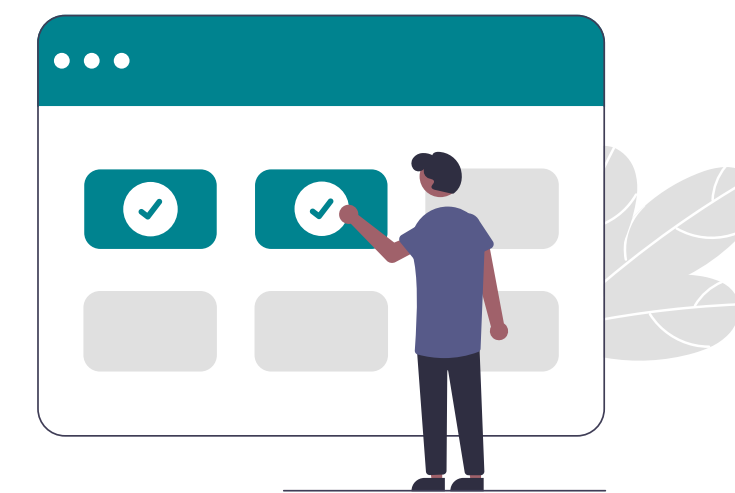

Supplier Integrations

We have connected Garage Hive with online and card terminal payment platforms Dojo, Pay 360, Payment Assist for financing, parts suppliers such as GSF Car Parts and many more to come.

Multi-Location Capability

It includes a built-in centralised accountancy package, advanced business intelligence reports, customer relationship management and much more.

Online Booking

This Garage Hive feature allows taking online bookings on your website or stand-alone page. It is entirely integrated with your schedule, sends automated confirmations, creates jobsheets and more.

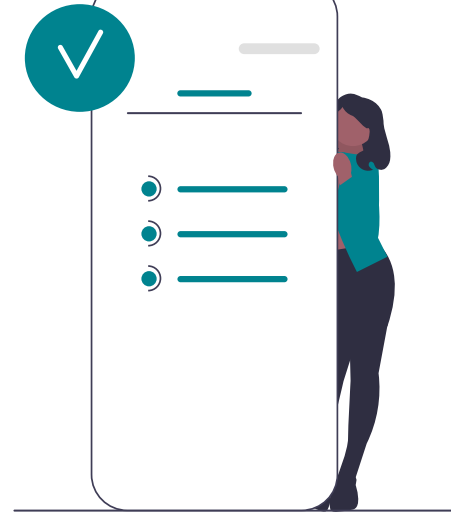

Electronic Vehicle Health Checks

Easy to create checklists and vehicle health checks in garage Hive and attach them to any jobsheet to allow the technician to carry out a vehicle health check on their device.

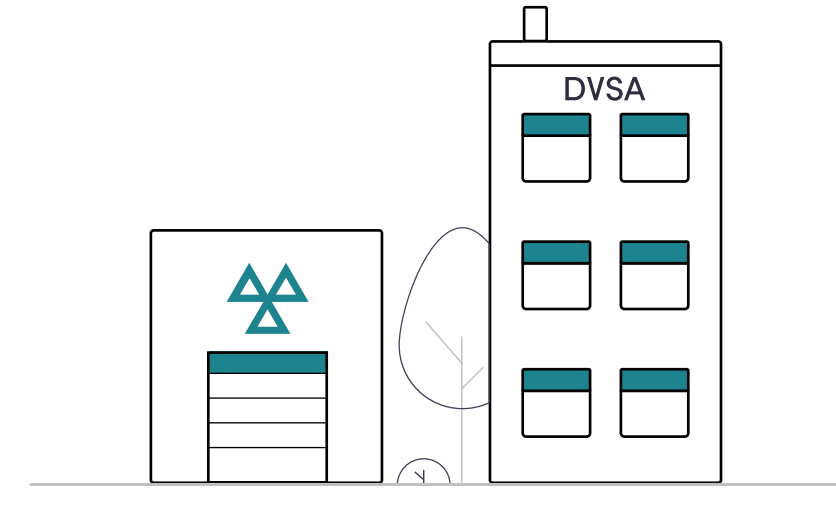

Customer Online Authorisation

Get a fast customer response to approve work on their vehicle after receiving an online estimate/report. A report can be sent with photos and descriptions via SMS or Email.

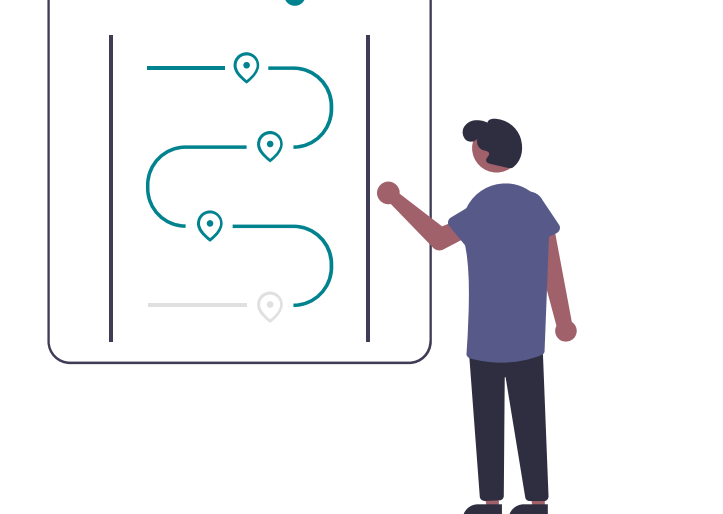

Automated Reminders

Garage Hive allows you to send many SMS or Email reminders automatically: MOT, Service, Timing Belt Changes, follow-ups for work reported on previous visits, in addition to booking confirmations and more.

MOT History

This Garage Hive feature allows taking online bookings on your website or stand-alone page. It is entirely integrated with your schedule, sends automated confirmations, creates jobsheets and more.

Complete Customer Journey

Garage Hive has multiple built-in features to assist your customers at each step of their journey when dealing with your business. From being reminded about certain services being due, to them leaving feedback after their visit. Garage Hive covers all of this using automation to bring convenience to customers whilst focusing on delivering great customer satisfaction.
