

Migration

Expand your digital workplace with Microsoft 365

Microsoft 365

ABOUT GARAIO AG

Since its foundation in 1994, the Swiss company GARAIO has developed into a leading software house. Long before digitalization took a dominant place in the agendas of company leaders, GARAIO was allowed to digitalize processes for business customers. The benefits of working with GARAIO can be seen in the simplification and increased efficiency of demanding business processes, but above all in measurable added value for our customers and their customers

WHAT WE OFFER:

1 ANALYSE

With the help of predefined reports and analysis software, we examine your source data. Benefit from our experience in the field of migration from Custom Solutions, SharePoint on-premises as well as Skype and Active Directory.

2 PILOT

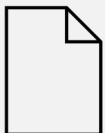

We recommend to carry out a pilot project. Because only live tests provide answers to questions about migration performance. We recommend that you migrate one or two significant repositories and then pilot their use.

3 MIGRATION

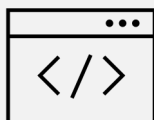

The migration steps consists out of a technical replacement and the introduction of the new way of working. Be aware that the project success is mostly driven based on the employee engagement later. Therefore, ideally, migration packages are planned together with introduction and training measures.

MIGRATION SCENARIOS:

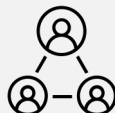

Documents

Intranet

Active Directory

Exchange

Skype

Applications

YOU BENEFIT FROM:

Expert guided program from A to Z

Fully integrated platform to drive innovation

Less operational costs

Sustainable ecosystem with great data quality

All-in-One solution with access from everywhere

More consistence in your data quality
