

# AI Governance Platform

**The First Tool That Truly Addresses the Governance of Generative-AI Usage**

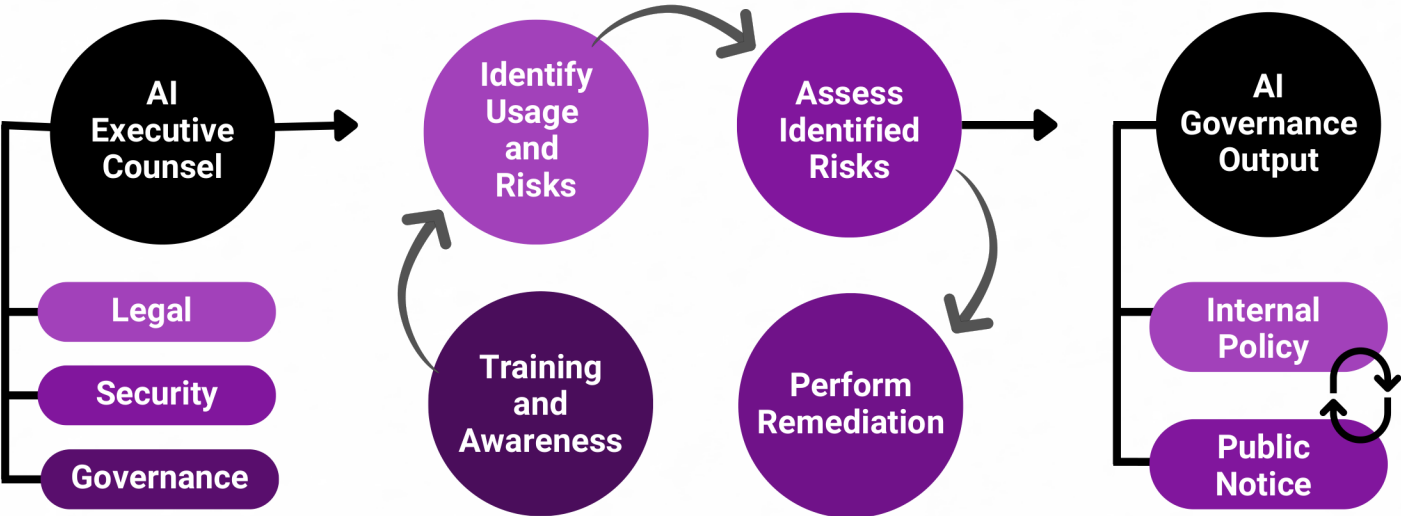

Whether your employees are using ChatGPT 4 to generate website content or an AI-driven tool to sift through resumes, that AI usage could be putting your organization at risk.

Implementing a comprehensive AI framework is critical to addressing the pillars of AI governance and ensuring ethical & and compliant usage while fostering innovation within your organization.

## AI Governance Framework

# AI Governance Platform

## The First Tool That Truly Addresses the Governance of Generative-AI Usage

### Simplifying AI Governance with Truyo

Current privacy laws already cover AI usage when it comes to PII, but more are coming. Manage your compliance journey with a comprehensive platform that includes assessments and training for emerging regulations like the White House Executive Order on AI, European Union AI Act, and more.

#### Discover Shadow AI

Truyo will scan your URLs, repositories, emails, and source code for AI fingerprints so you know where AI is being used in your organization

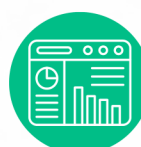

#### Survey Employees & Vendors

Send scheduled surveys to your employees and vendors with a questionnaire on where and how AI is being used and might access or compromise PII

#### AI Risk Management

Truyo has integrated an assessment based on the EU AI rules, alongside a NIST AI Risk Management Framework assessment, and a customizable, abbreviated version based on the NIST framework

#### AI Model Validation

AI laws seek to avoid bias, discrimination, and hallucinations - Truyo helps you test and verify those don't exist in your AI models

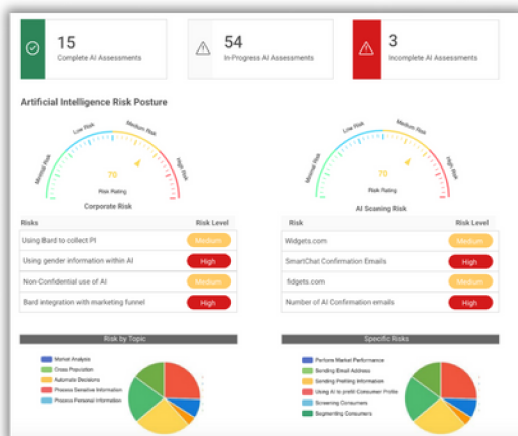

#### De-Identify Sensitive Information

Ensure sensitive information is not present or being used to test and develop AI models

#### Train Your Employees

Ethical and compliant AI usage training is key - Truyo provides critical training on all things AI including bias, ethics, and more

# AI Governance Training

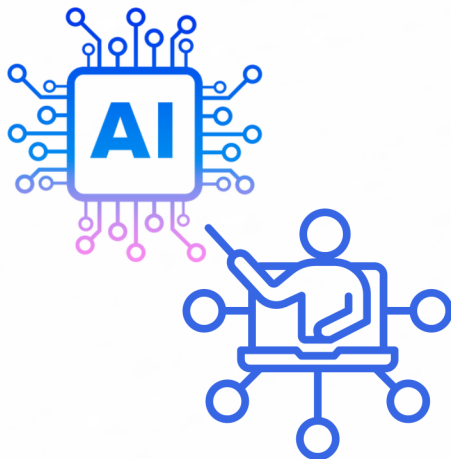

**Training your workforce on the ever-evolving AI landscape, regulations, risk, bias, and more.**

Training your employees on AI awareness and ethical usage is paramount to mitigating risks and extending governance beyond data privacy to AI. The Executive Order on AI released by the White House underscores the importance of training on AI with an emphasis on ethical usage, bias, and the potential for privacy violation. AI Governance Training by Truyo enables you to deliver effective and timely education to your employees on AI in this rapidly-evolving landscape.

## AI Governance Training Topics:

Generative AI Tools  
Ethical Usage  
Use Cases  
Associated Risks  
AI Bias

- The library of available trainings will be updated quarterly to keep current with emerging regulations.
- Training can be provided through your LMS or the Truyo LMS.
- Enterprise customization available.
