Managed transition to the cloud on your terms

Reduction in cost of storage

**Scalable Investment** | Cloud Archive offers two levels of services to meet your storage needs.

- 1 Disaster Recovery:** Safeguard your critical patient data through automated backup of onsite primary archive.
- 2 Long-Term Archive with Disaster Recovery:** Reduce costly overheads by offloading your long-term archive into our remote data centers. Clinicians get near real-time access to patients' prior images and you gain an affordable, secure, and reliable way to manage your growing storage needs.
