Connectivity

End-to-end **policy administration**

Whether you're an insurer, MGA or broker, Genasys's policy administration system covers the entire insurance policy lifecycle:

- ✓ Build no-code **Wholesale & Retail** quote-and-bind journeys.
- ✓ Renewals, mid-term adjustments and cancellations at your fingertips.
- ✓ Create customisable, optimised workflows to do more, faster.

Delivering **real results** for insurance businesses

"Our premium income was some R500 million (~£21.5m). By the end of this year, we're **set to close R4 billion** (~£172.5m)."

Mark Joubert, Guardrisk

"We needed rule-based automisation. As a compliment to Genasys, this was **deployed within six weeks.**"

George Parrott, King Price

Feature-rich and **functionally flexible**

Our out-of-the-box policy administration software is fully flexible and can be tailored to almost any conceivable scenario...

- ✓ Complex currency, taxation and languages across multiple regions.
- ✓ Alternative insurance models, such as parametric, micro or embedded.
- ✓ Co-insured products with multi-tier commission chains.
- ✓ Products with dynamic, third-party and/or AI-driven pricing.

No-code **product building tools**

Launch new products in a matter of days with no-code tools and 350+ pre-configured product templates, including:

- ✓ Dynamic question sets that adapt to the answers given.
- ✓ "If this, then that" based rating mechanisms.
- ✓ Bespoke documentation suite with tokenised data fields.
- ✓ Endorsements, excesses, refers/decline processes and so much more...

Visual dashboard reporting across your portfolio

Single policy reporting

Scheduled and distributed operational reporting

"What If" analysis

Drill down into pertinent information

Underwriting reporting

Comprehensive commission, claims and insurer bordereaux

Ad-hoc reporting on any data captured in the system, making all of your data accessible

Feature-rich insurance software

built by insurance experts for every eventuality

No-Code Product Building

Create, launch, and manage products with ease. Our intuitive no-code product builder allows you to configure and customise products quickly across any line of business with no technical expertise required. Respond to market demands faster than ever.

Comprehensive Policy Lifecycle Management

Seamlessly manage every stage of the policy lifecycle. From Quote to Bind, mid-term adjustments, renewals, cancellations, and policy servicing, our software supports every aspect of insurance operations with minimal admin.

Multi-Line, Multi-Risk Functionality

Support complex products with confidence. Whether you're handling personal, commercial, or specialty lines, our platform simplifies the management of multi-line, multi-risk policies with unparalleled flexibility.

Built-in Automation

Reduce admin overhead and improve accuracy with built-in tools for fully customising workflows to your unique needs. Automation is at the heart of Genasys. Streamline repetitive tasks, reduce human error, and free up your team to focus on more high-value activities.

API-Driven Integration

Seamlessly connect with your tech ecosystem with our open architecture. Leverage our 350+ robust and well-documented API endpoints to integrate with third-party tools, data providers, and emerging technologies, ensuring your business stays ahead of the curve.

Real-Time Data & Reporting

Get actionable insights at your fingertips. Generate accurate, real-time reports on policy performance, regulatory compliance, and financial metrics. Make smarter data-led decisions with instant access to the management information you need.

Genasys has everything you need to streamline and scale your business

Built-in rating engine: Target specific risk areas and easily and quickly build and change pricing to target new customers and products.

Auto-renewals and easy cancellations: Automatically identify and prepare policies for renewal, apply configured renewal rules, and issue updated documentation.

Single customer view: Easily access and navigate all your customer and policy information in one place.

Mid-term adjustments: Make multiple updates across multiple risks or covers simply and easily. e.g. add a driver to a motor policy, increase contents sum insured, or add a new cover – all within a single action.

Insights and reporting

Every insurance business is unique and so are the metrics you want to track. That's why Genasys offers reporting capabilities built to suit your needs.

You'll be able to instantly access visualised data for up-to-the-minute trends, or dive into more detailed analysis and reporting.

You can gain the customer, product, and process insights.

Document management

Our platform allows you to create, manage, and distribute the insurance documents you need.

You can create awesome looking documents for your customers without all the fuss. We've simplified the whole process, so that you can create on-brand dynamic documents that look great, straight out of the box, with zero coding required.

You can automatically upload or attach external documents too. Our document management feature comes with auto-fulfilment, making the process a breeze from start to finish.

Policy administration software you can trust
