HumanSoft

Technical Specifications

HumanSoft harnesses the full potential of the Microsoft Power Platform, utilizing each of its components for optimal performance. The core of the application is developed using Power Apps' Model-Driven architecture, with Dataverse serving as the primary data source. For analytics, we leverage Power BI's robust capabilities, while integrations are seamlessly managed through Power Automate.

Microsoft Power Platform

The low-code platform that spans Office 365, Azure, Dynamics 365, and standalone applications.

Power Apps
Application development
