SharePoint Intranet Quick Start: 4-Week Implementation

compass 365

Quickly deploy a modern SharePoint intranet

Our SharePoint Intranet Quick Start package is ideal for small to mid-size companies looking to quickly deploy a SharePoint intranet. The package was put together using our extensive experience and industry best practices to help you avoid pitfalls, deliver a modern SharePoint intranet, and provide the training and support to ensure your success.

TEACH YOU HOW TO FISH

We actively encourage you to learn and participate throughout the project. By the end of the engagement, your team will be able to manage the basics without outside assistance.

HANDS-ON SESSIONS

We're designing and building your intranet together in real-time. This approach provides hands-on experience, and the sessions are recorded and provided for your reference.

PREPARE FOR THE FUTURE

Three workshops are included that cover intranet governance, content strategy, and security. These highlight important components for long-term intranet success.

PROVIDE VALUE

We provide access to our custom webparts library to add features that are frequently requested but not available out-of-the-box.

ONGOING SUPPORT

We make getting help easy. Our support agreements provide peace of mind – there are no obligations or minimum usage requirements, you only pay for what you use.

CONTINUOUS IMPROVEMENT

We can partner with you on high value activities like developing new use cases or features and advising on increasing user adoption and satisfaction.

Delivering successful intranets to connect the modern workplace

Launch a modern intranet with the help of the experts at Compass365

PHASE 1: DEFINE AND DESIGN

- Work with stakeholders to define the requirements and information architecture
- Prepare prototypes and wireframes for review and feedback
- Review out-of-the-box features and and recommend add-ons and customizations
- Finalize design and deliver design specification

PHASE 2: IMPLEMENT

- Build a pilot site for stakeholders to test, provide feedback, and learn how to create and manage content
- Prepare targeted user and testing documentation
- Support testing and provide intranet administrator training
- Deploy site and support users and IT for first weeks of production use

Who We Are

Compass365 has been delivering SharePoint and Akumina intranets and portals since 2007. Our proven program is designed to help you get your intranet up and running as quickly and efficiently as possible.
