Microsoft security protocols can be deployed without negatively impacting users.

Combine the technical expertise needed with change management so your people know why this is good for them and for your organisation.

Manage access to information simply whether your people connect from office or home.

Enable your people to be more effective and your data secure.

Pre-pandemic only 20% of the workforce worked remotely

As of December 2020, the work-at-home number skyrocketed to 71% and looks like it will stay above 50% after offices reopen.

91% of workers state that flexible work environments increase their morale.

85% of businesses report that increased flexibility in work environments has led to increased productivity.

Generation-e's one-week engagement delivers:
- Overall guidance on strategy, planning, design, roadmap and impact analysis
- Identify issues and risks and business opportunities
- Pre-packaged services to deliver measurable results

90% of IT professionals believe remote workers are not secure.

46% of employees admitted to transferring files between work and personal computers when working from home.

68% of remote workers use personal devices for work with no corporate controls.

73% of employees working from home during the pandemic have not yet received any cybersecurity awareness guidance.
