

# Microsoft Places – Strategy

Gain a comprehensive understanding of Microsoft Places and its functionalities through a live demonstration, various use cases, and competitive analyses.

## Planning

### Continue on the Microsoft Places journey with ease

Microsoft Places Planning – begin your journey to improve coordination across your workforce and get intelligent insights about your spaces. Our 4-hour remote workshop is designed to revolutionise your workspace with Microsoft Places. This session will guide you through using Microsoft Places to optimise workplace flexibility, enhance in-person and hybrid meetings, and streamline space management with Copilot.

### Explore the Possibilities with Microsoft Places

This package includes a 4-hour remote workshop with topics including:

- Coordinate – Align people and place with purpose.
- Modernise – Rebuilding connections and improving the workplace experience.
- Optimise – Understanding effectiveness and engagement across your workplace.
- Integrations with connected workplace partners – Cisco Spaces, Appspace, VergeSense, and Verkada.
- Technical readiness & Licencing requirements
- Adoption and change management overview.
