80% touchless processing

Genpact Cora Capture | Extraction & Classification

Extracts invoice data, classifies and intelligently queues invoices for prioritization and urgency, provides a UI to capture human feedback for continuous learning

Genpact Cora Advance | Intelligent Workflow

E2E automation for invoice processing, GenAI driven exception management for complex scenarios and enriching experience with collaboration portals

Genpact Cora Trace | Invoice Anomaly Detection

Identifies patterns and anomalies using AI algorithms, continuously learns from historical data and constant user feedback, improving the ability and accuracy to detect irregularities over time

Genpact Cora Assist | Automated Helpdesk

Understanding intent in supplier inquiries, determining sentiment and responding in a conversational manner, consistently and swiftly driving better supplier experience.

Genpact Cora Capture
Extraction & Classification

- Extracts invoice data, classifies and intelligently queues invoices for prioritization and urgency
- provides a UI to capture human feedback for continuous learning

90% touchless processing with improved data capture and enrichment

Reduce processing time from >5 minutes to few seconds through higher accuracy and automated anomaly detection

Enables better cash strategy with 360-degree view of invoice in ERP in a timely manner

Genpact Cora Advance
Intelligent Workflow

- End-to-end automation of Invoice Processing and Payment cycle.
- Capability to identify and manage complex exception scenarios.
- Standardized and industry specific rules for exception management
- Easy integration with ERPs, other workflows and Payment systems.
- Continuous learning loop.

80 to 90% touchless processing	Reduction in processing time from 10 days to 1-2 days	Real time visibility on Invoice PO & Payment status – enabling accurate accruals & cash strategy	Improve Cost savings through reduced manual effort

Genpact Cora Trace
Invoice Anomaly Detection

- Identifies patterns and anomalies using AI algorithms
- continuously learns from historical data and constant user feedback, improving the ability and accuracy to detect irregularities over time
- Improve control through adherence to compliance requirements
- Limited requirement for Post Payment Audit & Recovery
- Audit coverage to 100% supplier invoices & suppliers
- Improve supplier relationship

| Enhanced Fraud Detection and Prevention, reducing financial losses due to fraud | Improve accuracy and speed | Productivity and efficiency: reduction in reconciliation and verification of false positives by 50% | Better Cash Flow Management |

Genpact Cora Assist
Automated Helpdesk

- Understanding intent in supplier inquiries, determining sentiment and responding conversationally
- consistently and swiftly driving better supplier experience

80-90% automation on response generation on amenable scope for Agentic AP Helpdesk	20-30% efficiency improvement from Day 1 with highly automated helpdesk function	>70% improvement in supplier NPS score with improvement in response accuracy and timelines
