

# GENXAS WHIZ

We believe that students can have a better life in a university. U SPARK is a smart university solution that enables students to complete their day-to-day activities in a university on mobile platforms.

U SPARK supports a wide range of functions that need to engage with the university such as accessing their information (class schedule, exam schedule, academic record, academic calendar); planning and registering for courses in the upcoming semester; collaborating with their colleagues in the classroom context.
