

Azure Migration Assessment Service - 1 Week Assessment

Genzeon Corporation

This service from Genzeon will help you assess and evaluate migration of your on-premise workloads to Microsoft Azure public cloud. We will assist you in evaluating all the aspects of your infrastructure, applications, and business processes.

Discovery

Network: Discover the network topology that includes Firewall, VPN, DNS, DHCP and other services

Identity: Discover Active Directory Domains and other Identity management solutions

Security: Evaluate current security architecture for regulatory compliance and map to Azure capabilities

Application: Understand the technical architecture and summarize potential compatibility issues. Create performance baselines.

Monitoring: Understand the current monitoring platforms and map to the monitoring capabilities of Azure

Cost: Existing application running costs, a forecast of cloud running costs post-migration, and the cost of migration itself

Deliverables

- Actionable assessment report.
- Proposed Azure infrastructure architecture.
- Test plan

Benefits of migration to Azure

Business Value of the Cloud

Costs

CapEx → OpEx
Transparency
Cost Savings

Agility

Instant Provisioning
DevOps and CI/CD
Modern Application Architectures
Faster Time to Market

Service Quality

Performance
Scalability
Reliability
Security and Compliance

New Scenarios

Big Data and IoT / Analytics
Machine Learning
Artificial Intelligence
Digital Transformation

Assumptions

- Up to 15 VMs or services
- The fee for the Azure migration assessment is US \$999
