**Transform your business
using AI, fueled by Microsoft
Copilot**

AI solutions designed with your business in mind.

We believe technology should work for you, not the other way around.

That's why we've created an easy, step-by-step, and people-centered way to incorporate AI into your everyday work.

Through our digital workshops, ready-to-go Copilot agents, and tailor-made projects, you'll learn how to weave AI into your workflows, all at a pace that suits you.

Together, we explore opportunities, understand your needs, and create solid solutions that change how your business runs without altering its essence.

With Microsoft 365 as our base, we're going to discover fresh ways to be more effective, gain new perspectives, and tap into new growth opportunities.

A team with you, every step of the journey.

Every workshop is guided by AI experts who will assist you from the initial test all the way to production.

You've got practical tools, test environments, and resources at your fingertips, all set for you to use in your situation.

We want to help you become independent, confident, and creative with Copilot.

A human-centered, concrete, and structured approach to AI.

We get that AI can feel a bit overwhelming at first. That's why we've put together a series of hands-on, straightforward workshops that are completely focused on the challenges your business faces.

Instead of trying to change everything all at once, we recommend taking it one step at a time. Explore, experiment, and gradually weave Copilot into your everyday routine.

Our AI workshops

The impact of AI on your business

Save time each day

Streamline your work by automating those repetitive tasks, making your processes easier, and cutting down on deadlines with smart, well-integrated tools.

Make smarter choices

Having real-time data at your fingertips allows your teams to make quicker, more informed decisions, whether they're helping a customer, setting up a meeting, or tweaking a strategy.

Concentrate your energy on what truly counts

When you cut out the low-value tasks, you give your employees the chance to concentrate on the initiatives that truly drive your business ahead.

Take your time to develop your tools

AI isn't here to take over your systems; it's here to enhance them. Together, we create solutions that evolve with your needs, both now and in the future.

Copilot agents that are ready to use

Looking for quick, tangible results?

Our ready-to-go Copilot agents are tailored to fit your organization's unique needs.

They're customized for your situation, thoroughly tested, and all set to roll out in Teams.

Every agent comes with:

- A workshop on framing with your team
- Tailoring to fit your processes
- Real-world testing
- A guided rollout
- A straightforward user guide for your team.

Several agents are ready to help you now.

FAQ HR Agent - 3,000 \$

It automatically responds to employee inquiries about vacation, insurance, policies, and more.

Employee Onboarding Specialist - \$3,000

Welcome your new team members, help them navigate their initial steps, and be there to answer any questions they might have.

IT Support Agent - \$3,000

Handles everyday IT requests and directs them to the right resources.

Internal Procedures Agent - \$3,000

Guides employees on the right procedures for internal administrative requests.

Security and Compliance Officer - \$3,000

Shares cybersecurity best practices and responds to inquiries about the organization's policies.

*These agents are connected directly to your SharePoint and your data, which must be available and structured beforehand.

Custom AI projects, powered by Copilot Studio and Azure

Thanks to our expertise in Copilot Studio, Azure AI Foundry, and Microsoft and OpenAI models, we design customized AI agents that integrate seamlessly with your existing processes, data, and systems.

Some examples of what we can build together:

- AI agents connected to your systems (SharePoint, Dynamics, Salesforce, ServiceNow, SAP) to automate tasks and centralize information.
- Autonomous agents capable of planning, learning, and interacting like a member of your team.
- Marketing assistant that generates personalized product descriptions from Business Central, ready to publish on Shopify.
- Customer support agent integrated with Dynamics 365 Customer Service, which offers personalized responses and escalates to a human if necessary.
- Sales agent connected to Dynamics 365 Sales, which detects upsell opportunities and automates follow-ups.

Why it's powerful:

- **Complete customization:** we configure agents according to your business needs.
- **Security and compliance:** your data remains protected, your standards respected.
- **Scalability:** we build solutions that grow with you.

Let's team up and shape the future of your business with AI.

Are you excited to see how AI can transform your operations?

We're all set to team up with you to come up with solutions that really work, boost efficiency, and give your business a valuable asset.
