Improve efficiency and customer satisfaction by seamlessly scheduling and managing appointments for online and in-store visits through our integrated system.

Track your success with live analytics

Get real-time insights and make data-driven decisions to optimize your online buying experience.

- ✓ Access all your usage and sales data
- ✓ Analyze the detail of each session
- ✓ All your customers data in one place

The screenshot displays the GETBEE Reporting interface. On the left, a sidebar contains navigation options: Homepage, Reporting (selected), and Meetings. The main content area is titled 'Reporting' and includes tabs for 'Team data' and 'My data'. A search bar is present with the placeholder text 'Search for a specific expert...'. Below the search bar, there is a 'State: All' dropdown and an 'Export' button. The central part of the dashboard features a list of call records. Each record includes a profile picture, the name of the expert (e.g., Samatha Smith, Martha Jameson), the time of the call (Nov 1 02:03 PM), and a status indicator (Completed or Missed). A 'Details' link is provided for each record. On the right side, there are two summary cards: 'Total number of calls' showing 1,347 and 'Clients satisfied' showing 4.9. Below these cards is a pie chart illustrating the distribution of call statuses: Completed (dark blue) and Missed (light blue). At the bottom left, there is a 'Status: Online' indicator with a green toggle switch and a 'Check camera & audio' link. Below this, a profile card for 'Andrew Smith' (Expert) is visible. At the bottom right, a pagination bar shows 'Results: 1-10 of 34' and page numbers 1, 2, 3.

Data Security & Compliance

At Getbee, we take data privacy and security seriously.

- ✓ Data centers in all regions making our platform fully compliant with GDPR (GRPR) and American Data Privacy Protection
- ✓ Microsoft Azure's encryption and security measures to protect our clients' sensitive information.
- ✓ Our team is constantly monitoring our systems and implementing new security measures to ensure that your customer data remains safe and secure.
