

Azure AI – Gen AI

OpenAI

Azure AI Gen AI OpenAI offer

MISTRAL AI

A complete solution

Inetum offers you a complete solution for accessing the latest advances in generative artificial intelligence on Microsoft Azure. With the models proposed by Open AI, can be used on any language-based task thanks to their state-of-the-art reasoning and knowledge capabilities.

NATURAL LANGUAGE

Exceptional performance

OpenAI offers exceptional performance and is ideal for applications requiring advanced contextual understanding. Access the world's most advanced natural language processing models with the ability to generate text, answer questions and perform complex tasks in various languages.

APPLICATIONS

Language processing

With OpenAI, you can incorporate language processing features in your applications to make them more innovative, more engaging, and easier to use.

Incorporate language processing features

→ Applications More : innovative, engaging, & easier to use

Chat and conversation interaction

Writing assistance on specific topics

Code generation, review and comments

With Azure, you can build a **RAG Retrieval Augmented Generation** solution. Through code and other components, you can design a comprehensive RAG solution that includes all the elements for generative AI over your proprietary content, your enterprise content.

- Importance of **trustworthy & Safe** AI Systems
- Azure AI Studio : ensures customers **benefits** (Azure AI Content Safety) : **Safety/ Bolstering/ Security** and **reliability** of AI Solutions
