Creating Power Apps MVP in 4-weeks: Solve your business case with creating low-code business application for desktop and mobile

ABOUT GGROUPP:

We are team of enthusiasts focused on helping companies to transform via rapidly creation of business applications on Microsoft low-code technologies – Power Platform

WHAT WE OFFER

As a result of this 4 weeks, you will get working Power Apps solution that you can use to automate your business process and showcase it within your organization. In addition to that you will get an overview of Microsoft low-code tools and understanding how to apply this capabilities for your business automation.

If you already have Office 365 / Teams / Dynamics. 365 , we'll show you the ways of extending existing functionality with Power Platform on real example.

We will design and create low-code solution for relevant business scenario together with your team with experience architect recommendation and guidance.

As a result of 4 weeks, you will get a working application, roadmap and budget estimation to extend solution if needed.

See what customers are saying:

"Before Power Platform we had complex manual process which requires automation in a short time. After we developed first MVP we can gather all necessary information online in one place. New modern App gave us opportunity to collect information quickly. Business process became transparent and standardized. ..."

– Pavel, IT Manager
One of the largest HoReCa company in Russia

Why Power Platform?

The only set of low-code tools your teams need to stay agile and build solutions that move your business forward. Microsoft Power Platform is built from the ground up to work together with strong security, management, and compliance – plus room to grow.

Connected tools

No other low-code platform offers the ability to work so easily together—and with Microsoft cloud services, hundreds of business applications, and other data sources using a library of connectors.

Security and compliance

All Microsoft Power Platform tools are built on Azure, so each inherits the same enterprise-grade security, certifications, and administrative controls trusted by businesses around the world.

Limitless possibilities

With built-in connectivity to services like GitHub and AI Builder, professional developers are able to easily switch between tools while building applications that span a full range of complex requirements as your needs grow.
