

# Your AI Co-Worker for Smarter, Faster, and Human-Centric Operations

## What is G Agent?

G Agent is a secure, multilingual multi-agent AI system designed to work with your workforce—not replace it. Built by Ghaia.ai, it automates operations, learns from interactions, and collaborates across departments to deliver faster results, lower costs, and smarter decisions.

Unlike traditional AI tools, G Agent is made up of interconnected intelligent agents—working in orbits across your business functions (HR, Finance, Legal, Procurement, and more) to plan, act, and evolve with your needs.

## Key Features:

### Cross-Department Automation

Execute tasks across multiple teams with seamless coordination.

### Multilingual & Secure

Built to scale globally with enterprise-grade security and localization.

### Industry-Specific Intelligence

Preconfigured for Oil & Gas, Government, and Retail with tailored use cases.

### Human + AI Collaboration

Augments employees by automating repetitive work—freeing time for strategy, creativity, and innovation.

## Business Outcomes:

- Reduce operational costs through intelligent automation
- Improve employee productivity by eliminating repetitive tasks
- Make faster, data-informed decisions across the organization
- Adapt quickly to change with continuous learning agents
- Deploy AI solutions with industry-ready best practices

## Who is this for?

Enterprises looking to scale AI adoption across departments and industries—including public sector, energy, and consumer markets.

## Available Now on Microsoft Marketplace

Whether as a workshop, assessment, PoC, or full implementation, G Agent can be tailored to your enterprise needs and is co-sell ready for Microsoft field engagement.
