construction
for splash and
dust
resistance

Convenient
form factor for
ultimate
portability

Offers support
for multi-user
and multi-
account
scenarios

FIDO enabled
for cutting-
edge
interoperability

Benefits for enterprises and their employees at a glance

- Protects your company assets at highest level by involving smart card security
- Introduces strong identification in any physical and logical access transaction
- Works on any kind of platform (e.g. mobile devices, desktop PCs, machines)
- Seamless and cost efficient integration into your business applications and processes
- Largely improves the efficiency of the co-workers with a fast and easy handling

Benefits for financial service providers and their customers at a glance

- Great user experience for enrolment and online/offline payments
- Reduces the risk of fraud and improves security
- Allows easy issuance through tokenized mobile payment
- Performs card holder verifications on the user's own device avoiding contaminations on PoS terminals
- Allows easy management and tracing by the end-user itself through companion app which reduces costs

Enabling secure FIDO based authentication ...

Based on free and open standards, FIDO authentication enables password-only logins to be replaced with secure and fast login experiences across websites and apps.

Enabling secure mobile payment

Protect online banking and payments with simpler, stronger authentication based on open and scalable standards.
