

MasterCare 

**Secure Messaging Delivery (SMD)**

**A secure messaging system for sending and receiving health documents electronically.**

[www.master-care.com.au](http://www.master-care.com.au)

# **Remove paper, reduce risk, and grow your referral network**

Enable automatic referral delivery to your clinical system with our secure messaging system (ReferralNet). Allowing you to digitise your referral management processes and grow your referral network.

## Reduce overhead costs by removing paper from your practice

Remove the costs associated with manually purchasing, scanning, faxing and filing your paper documents. Helping you scale your business the affordable way.

## Improve efficiency by automatically transforming paper into digital documents

Improve staff efficiency by automatically transforming your inbound paper referrals, faxes and clinical notes into electronic documents. Removing the risk of data loss and manual errors associated with paper management.

## Stay safe with our secure messaging protocols

Enjoy a secure messaging service that meets all Australian CDA, HL7 v2 and FHIR standards. Ensuring your referral data remains encrypted and confidential at every stage of the referral journey.

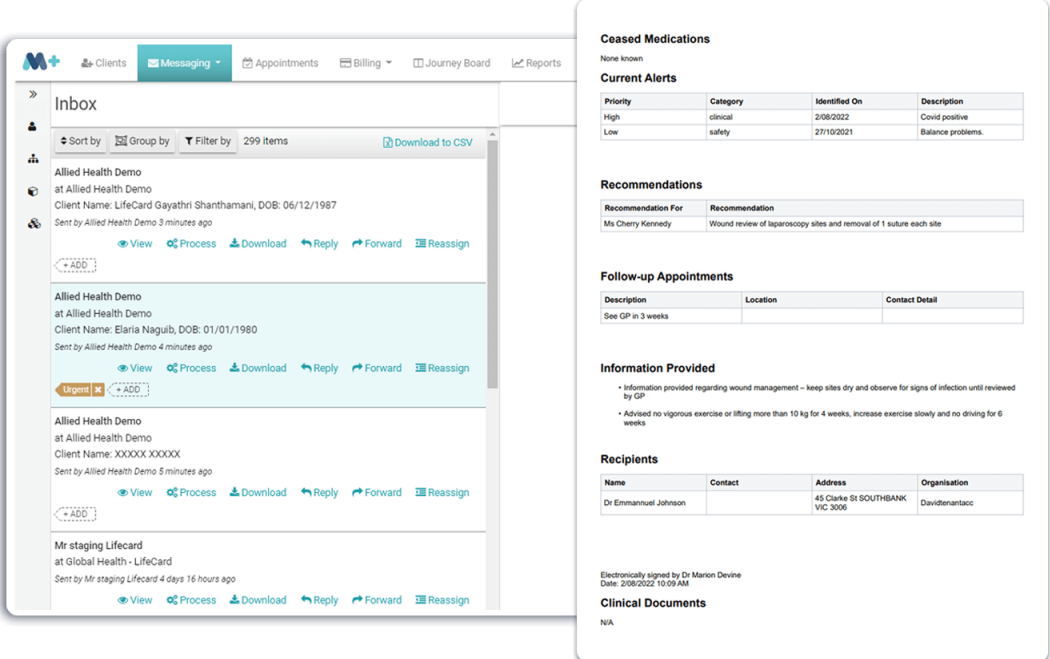

# Available features

## Electronic referrals

Securely send and receive electronic referrals, clinical notes, letters and more with your network of care providers.

## Electronic faxes

Transform your inbound paper faxes into electronic faxes and send them alongside your electronic referrals using our GoFax integration.

The screenshot displays the MasterCare messaging interface. The main window shows an 'Inbox' with three messages from 'Allied Health Demo'. The first message is for 'LifeCard Gayathri Shanthamani, DOB: 06/12/1987'. The second message is for 'Elaria Nagub, DOB: 01/01/1980' and is marked as 'Urgent'. The third message is for 'XXXXX XXXXX'. Below the inbox, there is a message from 'Mr staging Lifecard at Global Health - LifeCard'.

On the right side, a detailed view of a message is shown, containing several sections:

- Ceased Medications:** None known.
- Current Alerts:** A table with columns: Priority, Category, Identified On, Description.
 

Priority	Category	Identified On	Description
High	clinical	2/08/2022	Covid positive
Low	safety	27/10/2021	Balance problems.
- Recommendations:** A table with columns: Recommendation For, Recommendation.
 

Recommendation For	Recommendation
Ms Cherry Kennedy	Wound review of laparoscopy sites and removal of 1 suture each site
- Follow-up Appointments:** A table with columns: Description, Location, Contact Detail.
 

Description	Location	Contact Detail
See GP in 3 weeks		
- Information Provided:**
  - Information provided regarding wound management – keep sites dry and observe for signs of infection until reviewed by GP.
  - Advised no vigorous exercise or lifting more than 10 kg for 4 weeks, increase exercise slowly and no driving for 6 weeks.
- Recipients:** A table with columns: Name, Contact, Address, Organisation.
 

Name	Contact	Address	Organisation
Dr Emmanuel Johnson		45 Clarke St SOUTHBANK VIC 3006	Davidtenantacc
- Clinical Documents:** N/A.

At the bottom of the detailed view, it states: 'Electronically signed by Dr Marion Devine Date: 2/08/2022 10:09 AM'.

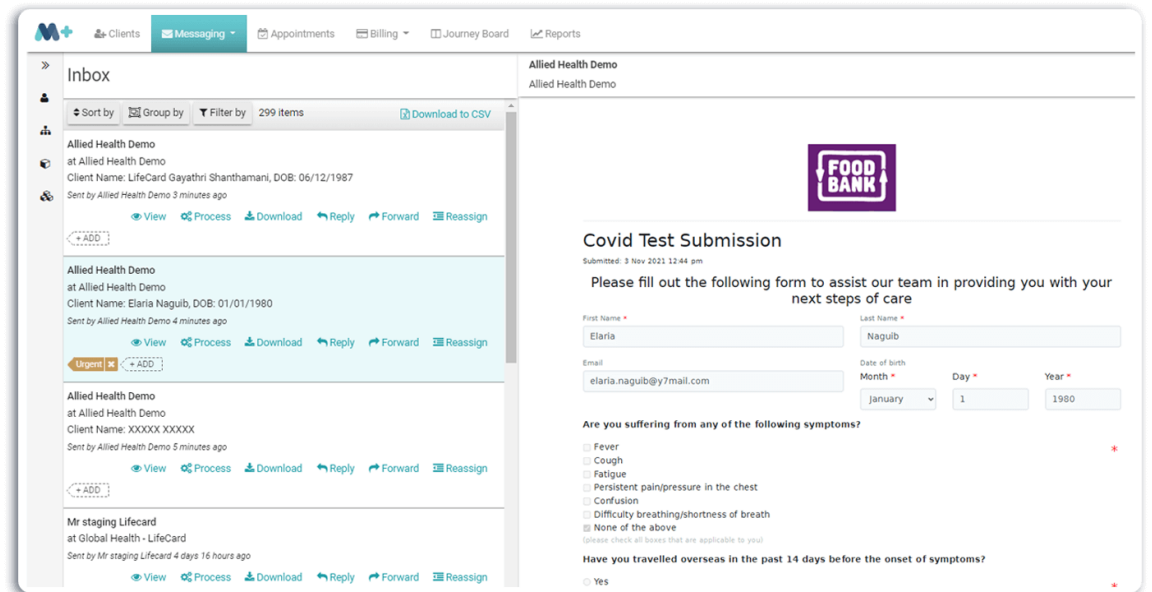

# Available features

## Online directory

Grow your referral network by leveraging the power of FHIR R4 to securely connect with Argus and other clinical system users.

## Scalability

Our service is fully scalable to meet the demands of your organisation. Leveraging hosted endpoints to connect you with your growing network.

The screenshot displays the MasterCare web interface. On the left is an 'Inbox' with three messages from 'Allied Health Demo'. The first message is for 'LifeCard Gayathri Shanthamani, DOB: 06/12/1987'. The second is for 'Elaria Naguib, DOB: 01/01/1980' and includes an 'Urgent' tag. The third is for 'XXXXXX XXXXXX'. The right pane shows a 'Covid Test Submission' form for 'Elaria Naguib' with fields for first name, last name, email, and date of birth. Below the form are sections for 'Are you suffering from any of the following symptoms?' and 'Have you travelled overseas in the past 14 days before the onset of symptoms?'.

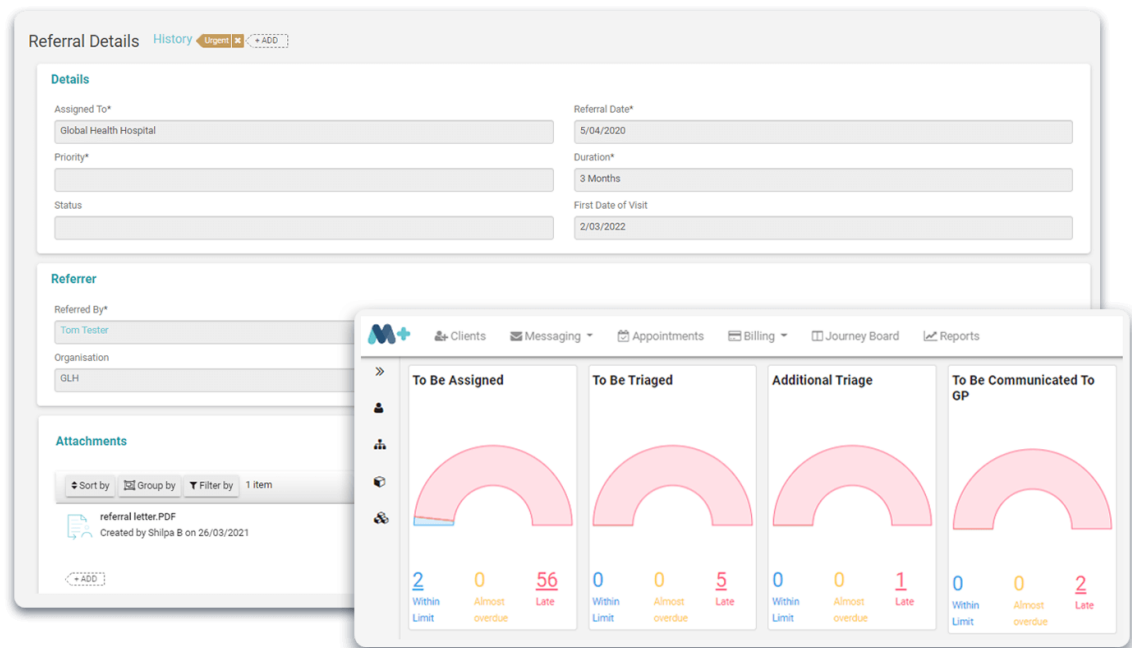

# Available features

## Low cost

Save on infrastructure and maintenance costs with hosted endpoints, operations assistance and patch management run by our team.

## Secure and compliant

Stay safe with our secure messaging delivery service. One of few systems that meet Australian CDA, HL7 v2 and FHIR interoperability standards.

# Our organisation

## Tailored solutions for Australian hospitals, community and mental health providers.

MasterCare is part of the Global Health family. As an ASX listed company (GLH), we are proudly Australian owned and operated, and have a market-leading understanding of the healthcare landscape. We were founded in 1995 with the vision to connect clinicians and their patients. Today, 1000+ health organisations across Australia use our solutions.

### Why MasterCare?

1. We are Australian owned and operated with deep domain knowledge, cost effective solutions and an understanding of our complex healthcare system.
2. We deliver high quality, innovative solutions in collaboration with our customers. Adapting our products to meet their complex reporting and operational requirements.
3. We are a trusted provider of Australian health technology. Allowing our clients to scale their services over the long term without needing to change providers.

# Our experience

Over 1,000 Australian health organisations use our solutions every year.
