

# GlobalLogic OpeNgin DevOps Accelerator

A modular, integrated, ready-to-use DevOps tool chain that drastically accelerates product development

## Reduce your implementation timeline from months to weeks

Based on proven technologies and best practices, OpeNgin is a comprehensive DevOps solution that automates cloud infrastructure setup, deploys and configures tools, and jump-starts CI/CD pipelines. OpeNgin seamlessly integrates with existing standard CI/CD tool stacks, plus all three major cloud providers (i.e., AWS, Azure, GCP). You can also expand the solution's benefits by adding on services such as Professional Services / Customizations, Roadmap Acceleration, Managed Services, and Support.
