DISCOVERY X-RAY PACKAGE

SWIFT ANALYSIS OF NAV/BC ON-PREM CODE FOR A PREDICTABLE BUSINESS CENTRAL CLOUD MIGRATION

ABOUT THE PACKAGE

Poor understanding of the ERP condition and the accumulated modifications within complicate future cloud migration with extra expenses or unpredictable duration.

We help prevent such surprises before moving the system to a cloud version of Business Central with Discovery X-ray: an in-depth automated analysis of the changes made to the ERP code.

We reveal them to kickstart a well-planned cloud migration with predictable timelines and outcomes. The package is the initial step of Stairway to Cloud, our complete cloud migration suite.

HOW IT WORKS

1 — SECURE CUSTOMER REQUEST AND INPUT

- Use our online portal to securely submit a request and the necessary details for analysis (a form about desired changes, a text file (.TXT) with code, or .BAK/.FBK files with test data only for further analysis).

- You may submit additional input files to deepen the analysis.

2 — 2*-DAY AUTOMATED ASSESSMENT

- We use an internal automated tool to compare the standard code with the current customer version to reveal the system modifications.

- Then we generate the modifications list. The findings are allocated to affected functional areas in BC (Finance, Sales, Purchases, etc.), for precise migration calculations.

3 — DELIVERING INTERACTIVE DELTA FILE WITH THE RESULTS

- You receive a swift analysis of the old ERP code in an Excel delta file with system modifications.

- You can interpret the results to plan further migration steps at once thanks to the file's interactive filtering and intuitive layout.

Get a sample report

4 — USING THE RESULTS FOR CLOUD MIGRATION

- The results of the tool are essential early in the discovery phase of cloud migration to understand changes made in the ERP,

- to plan the next steps in the migration process (e.g., workshops and fit gap analysis.),

- and after the scoping – to better understand the cloud migration cost depending on the number of changes.

* duration may vary depending on the number of modified objects that shape the project's complexity

Global Mediator | ERP Dynamics | Power Platform | QA | .NET | UI

- **Tangible results in 2 days:** a detailed report based on the Discovery X-ray analysis that allows to start planning the migration straight away.

- A high-level **indication of costs** for a migration project, either in terms of budgeting (cost) or hours.

KEY BENEFITS

- **Time efficiency:** the analysis is delivered in a 2-day turnaround time (which may vary depending on the project complexity).

- **Initial indicators for a cloud compatibility check:** the Discovery X-ray results can later be used to assess how well the current NAV/Business Central installation aligns with the target version to start a predictable cloud migration.

- **Optimal costs and effort allocation** based on the revealed system modifications.

PRICE

Euro 950, one-time payment
