

100% Cloud

Fast Lane to the Future Workplace with Windows 10 and Office 365

Provision your new Windows Workplace fully automated thanks to a combination of Azure AD and Intune. This makes a direct, uncomplicated shift to the Cloud possible.

What is 100% Cloud?

The Glück & Kanja **Future Workplace Blueprint** supports you by moving your existing global on-premises client infrastructure to 100% to the Cloud. Therefore key elements are software distribution and security management directly from the cloud based on Intune and EMS.

Why are customers introducing 100% Cloud?

- Short project periods
- Low costs
- Maximum future oriented
- High level security for the future workplace
- Benefit from Software Packaging as a Service
- Less complex than a hybrid system architecture
- Proven model in thousands of workplaces

Lower costs and less complexity

- Short project times for the introduction of Office 365
- Simplification of the migration
- Full use of the Future Workplace

Save costs

Immediate Windows 10 rollout

- No need of on-premises distribution (SCCM)
- Provisioning of Windows clients worldwide in one hour
- Software packaging as a Service by request

Fast and with less risks to the Cloud

More security against cyber threats

- Consolidation of your IT security solutions
- Proactive protection against new threats (Ransomware etc.)
- Central monitoring und GDPR conformity

The safest Windows ever

The secure modern digital workplace for communication & collaboration to be used from everywhere and every device operated in the cloud. Especially I am very proud to put the word 'secure' in because since we are running this client now we not had yet even one security incident on all of these new clients compared to our existing platform.

- Steffan Haas, Head of Infrastructure Steering, DB Schenker

What advantages brings the 100% Cloud strategy

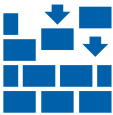

Avoid hybrid solutions

- Complex, time consuming and expensive in operation
- No full utilization of the Cloud benefits
- IT security is determined by the old solution

Take the chance to make everything new

- We offer a complete new infrastructure
- This infrastructure is secure, evergreen and manageable centrally
- We update users, data and applications from the old world to the new world

We take care of everything

- Packaging of your applications at a fixed price
- Building a Azure infrastructure to migrate your LoB applications
- WLAN authentication and printing as a Cloud service
