## FOUNDATION FOR AVD

Azure Virtual Desktop Infrastructure Deployments Secure. Proven. Scalable.

Foundation for AVD

#### Foundation for AVD - What

Architecture & Backend Setup

Network Integration

Pool Definition and Deployment

Automation & Tools

Image & Application Management

Monitoring

AAD & Intune Enrollment

100 % Azure-native components & IaC-deployment

#### glueckkanja=gab

Foundation for AVD

#### Foundation for AVD - How

### Parameterization Workshop

1-Day Workshop:
Dive into AVD
Foundation functionality
and decide for
configuration options

Deliverable:
Workshop
documentation and
decision log

### Foundation Deployment

Foundation for AVD delivered into customer's tenant

Deployment from GitHub

### Handover & Training

Foundation for AVD Hands-on Session, Walk-Through, Fine-Tuning

Deliverable:
Foundation for AVD
production environment
+ documentation
(runbook)

### Managed service onboarding

**Optional** 

Customer and Foundation for AVD onboarding

Deliverable: Runbook + soft-launch

Our target: lead time to value : 3-4 weeks

# Architecture & Backend Setup

Foundation for AVD

#### glueckkanja=gab

Foundation for AVD

#### High-Level Architecture

- Azure Active Directory for identity management
- Virtualization Infrastructure as a Managed Service
- Flexible operation of the VMs in your Azure Subscription
- Easy management via Configuration Manager or Intune (supplemented by "Realmjoin for AVD")
- Easy connection to on-premises resources
- Fast implementation
- Economical use of resources (central profiles, central applications, simple patch management)
