SCEPman

Cloud based Certification Authority

RADIUSaaS

Authentication service for your network

PKI is evil.

Run away with Intune

RADIUS is so 90s.

But it **rocks!**

Basic Idea of SCEPman und RADIUSaaS

Goal: Seamless & secure network access

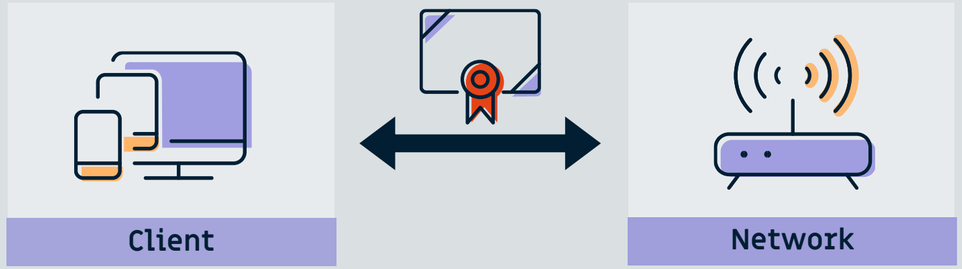
SCEPman

RADIUSaaS

Basic Idea of SCEPman und RADIUSaaS

Design Goals:

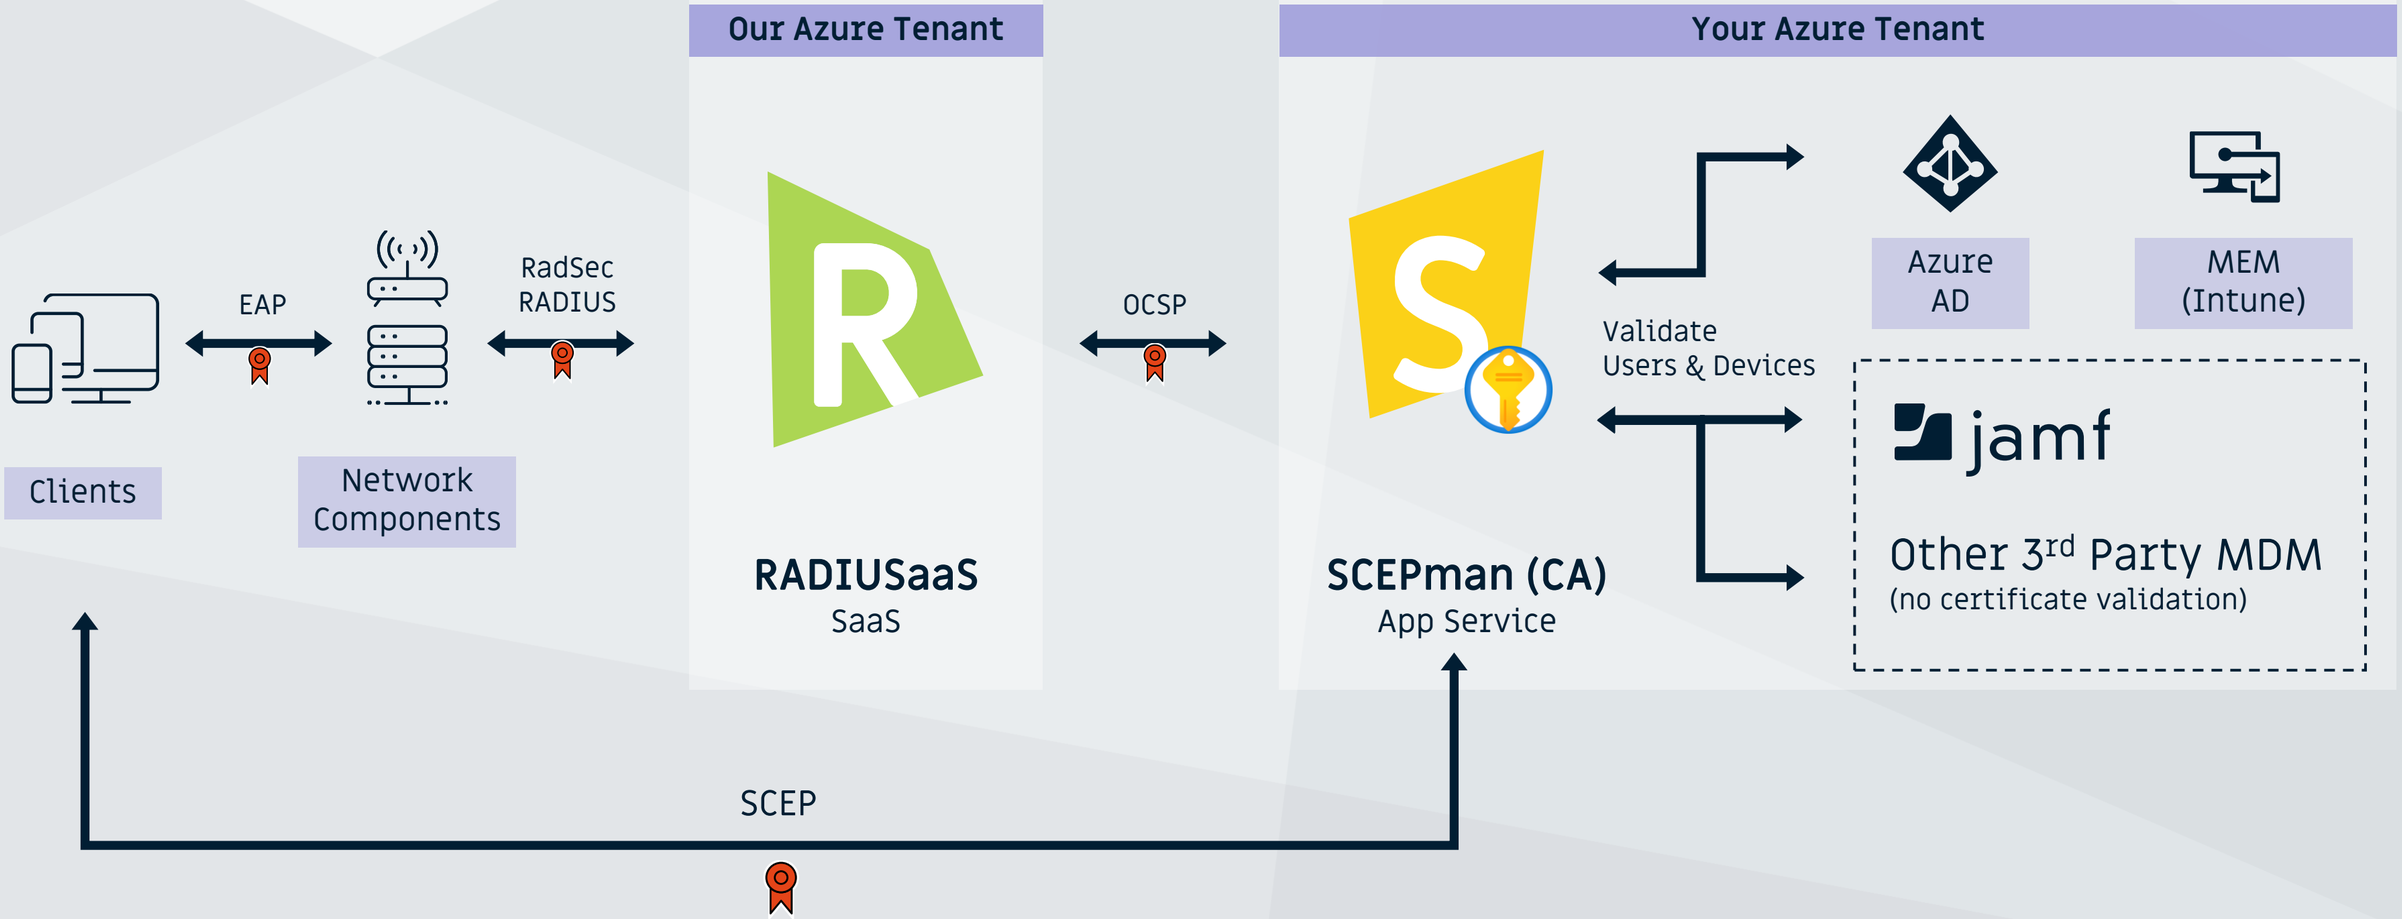
- Seamless for users
- Easy for admins
- Secure
- Integration with Microsoft 365 & JAMF client management
- 100 % cloud solution built on Azure



SCEPman

RADIUSaaS

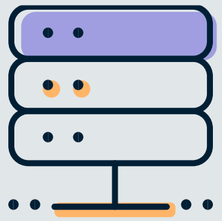
Cloud-Based Network Authentication



Use-Cases

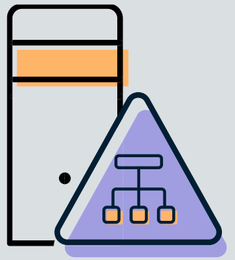
Client

User and device certificates for network authentication



Server

Certificates for internal servers



Domain Controller

Enable legacy resources for WHfBH devices

Benefits

Easy

Secure

Scalable

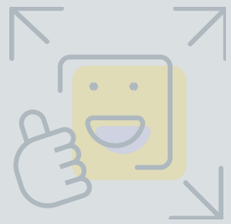
Benefits

Easy

- 100 % Azure cloud - no on-prem components
- Lightweight
- Fast setup (install directly from Azure Marketplace)

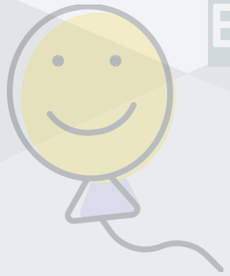
Secure

- Easy to operate (almost no ongoing maintenance)
- Fully automated certificate lifecycle for clients



Scalable

Benefits



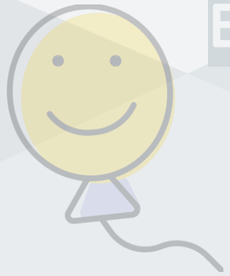
Easy

Secure

Scalable

- Realtime certificate validation with MDM & AAD integration
- ISO 27001 certified development & operations

Benefits



Easy

Secure

Scalable

- Customers around the world
- Starting from 50 to more than 70.000 clients
- High scaling architectures possible (multi geo, multi instances, CA hierarchy)
