

HtmlWasher

HTML cleanup tool & simplifier

An online tool that reduces HTML to basic tags and attributes. Removes scripts, CSS, and other non-basic elements like `<object>`, `<canvas>`, etc... Also, corrects errors and formats the HTML doc or a fragment.

HtmlWasher Home History of HTML Share

HTML cleanup tool

Reduces a HTML document (or fragment) to basic HTML tags and attributes - clean HTML

Need to just correct a HTML, not to clean it up? Try out [HtmlCorrector](#), a tool that fixes HTML

Copy & paste Upload

Paste HTML to clean it up

Wash

What exactly does it do?

- Fixes or removes non-well formed tags and attributes (e.g. adds alt attributes to images if missing)
- Converts the markup to HTML5 (if it is XHTML for example)
- Reduces the markup to: `<a href>`, `<body>`, `
`, `<h1>`, `<h2>`, `<h3>`, `<h4>`, `<h5>`, `<h6>`, `<head>`, `<hr>`, `<html>`, `<i>`, ``, ``, ``, `<p>`, `<ruby>`, ``, `<table>`, `<tbody>`, `<td colspan rowspan>`, `<th colspan rowspan>`, `<title>`, `<tr>`, ``
- Replaces `` to ``
- Reformats the HTML (line breaks, indents)

Example

Input: `<p class="funny" onclick="alert('LOL')">bla bla</p>`

Will simplify HTML to: `<p>bla bla</p>`
