XFA Complete your device security

DEVICE SECURITY IS FUNDAMENTAL

The gateway to cyber incidents

40%¹ of devices unsafe

These are often (unmanaged) devices used for work, or devices of third parties (freelancers, partners) with outdated software.

1/3 ³ of cyber incidents are linked to insecure devices.

Hackers love outdated devices

PCs and smartphones with outdated software contain 'leaks' that can be exploited by hackers.

DAMAGE FROM CYBER INCIDENTS IS SIGNIFICANT

When your organization is impacted, the damage occurs on various levels:

- · interruption of business activities
- payment of ransom
- restoration of IT systems

- theft of confidential information
- reputational damage
-

XFA KEEPS ALL DEVICES SECURE

Only secure devices are used for work.

User self-onboarding in

3 minutes

XFA conducts **essential checks** on each device upon login:

- up-to-date operating system
- up-to-date browser
- disk encryption
- password set

Solution set up in

15 minutes

• presence of antivirus software

Easy for IT teams

More cost-effective and less complex.

XFA software is **non-intrusive**, meaning it does not track your activities, nor can it remotely modify your device.

Applicable to **all devices**, including Bring Your Own Device (BYOD), and devices of freelancers or external partners.

Scalable compliance

Gain **insight** into all devices using your business applications and their security status.

XFA helps in achieving ISO27001, SOC2, or GDPR certification

XFA SOLUTION, HOW IT WORKS

Authentication/Sign-in

User authenticates with existing identity provider.
