GLYNT.AI Highlights

Advanced 'Few Shot' ML

With more than 60,000 water and energy utilities in the US alone, our ML conquers document variety with > 98% accuracy

Global Partners

Our Mission

Every home, business and community can produce and profit from their sustainability data

Our Vision

To be the fastest path from sustainability data to monetization. A win for our customers, our partners, for GLYNT and the planet

A New Class of Demands on Sustainability Data

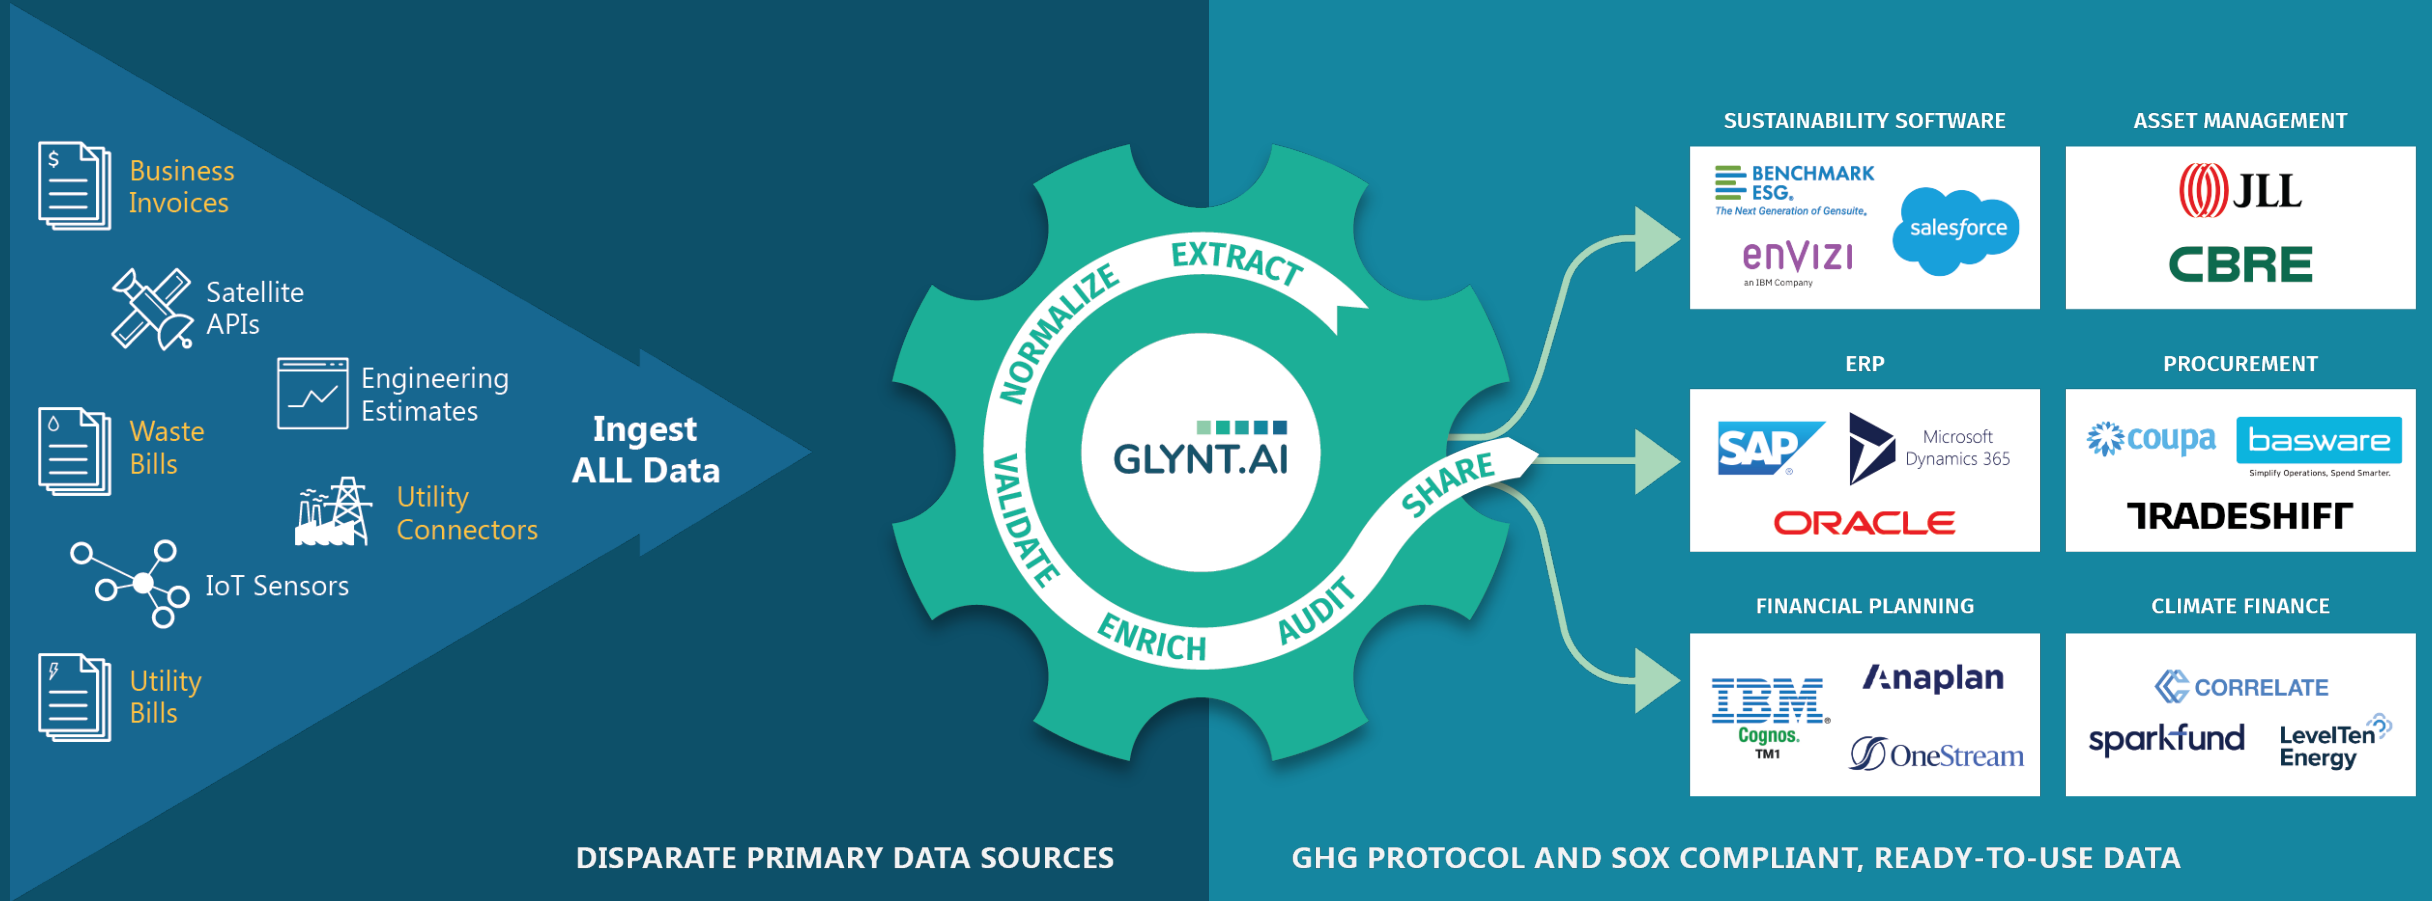

THE OLD WAY

- Siloed team gathers utility bills once per year
- Manual data entry for 2-3 months
- Individuals use their own judgement
- Industry average estimated data widely used
- IoT sensors and other data sources not included
- CSV file uploaded to visualization/reporting software
- Finance team is out of the loop

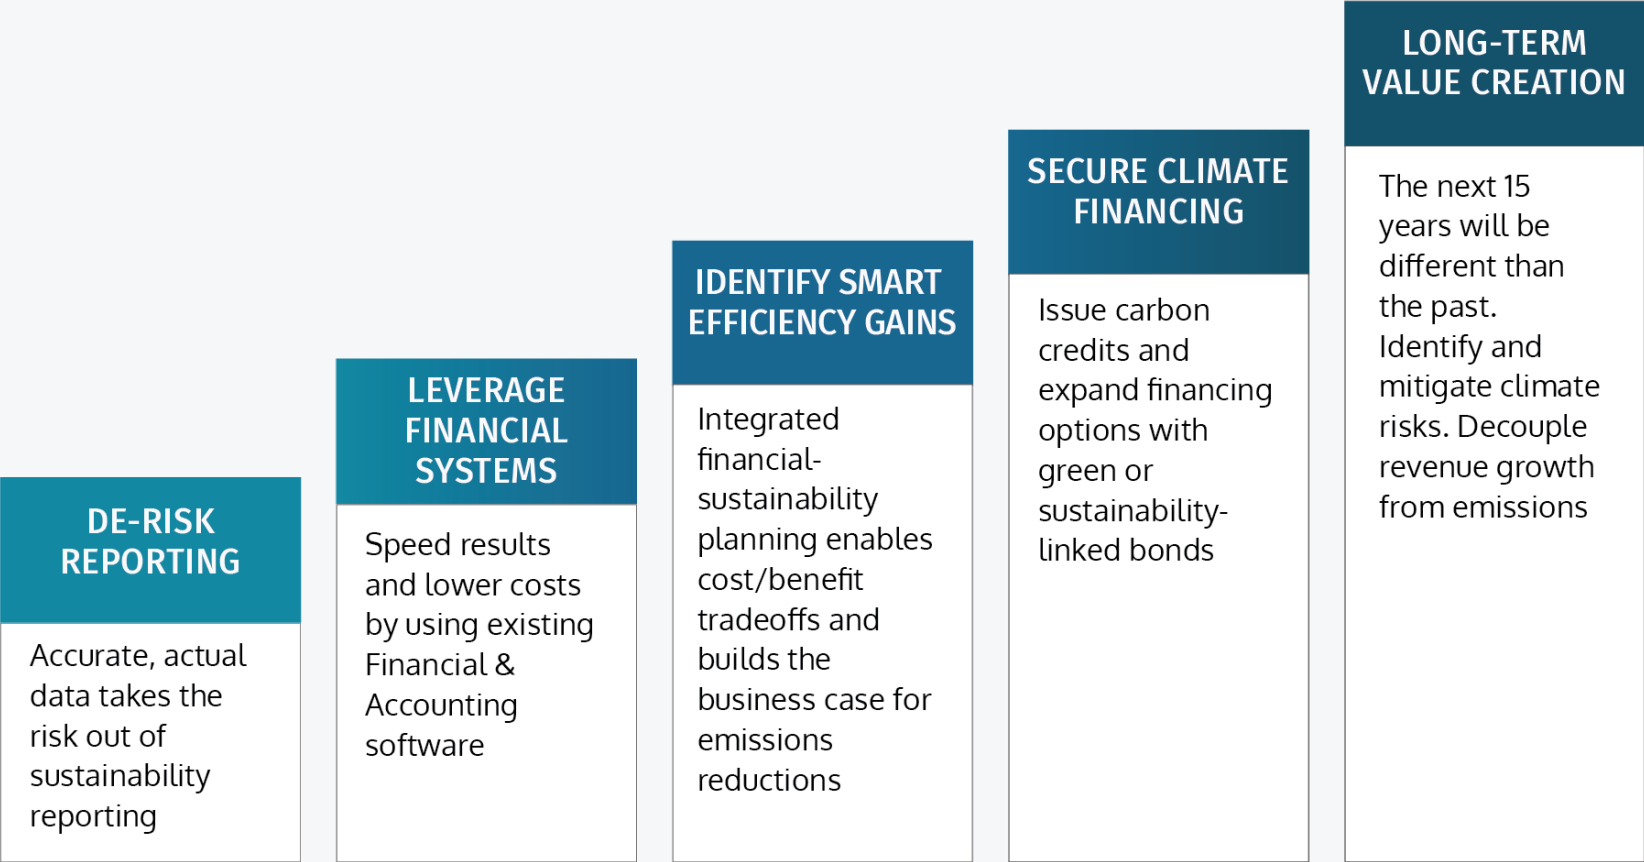

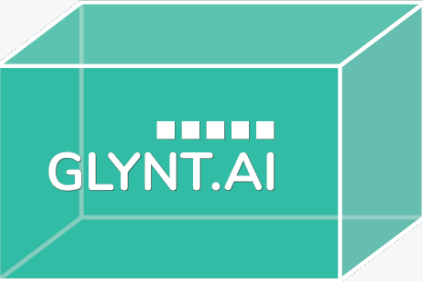

NEW DEMANDS

- Quarterly reporting
- Audits before reporting
- Disclosure risk exposure if sustainability data is incorrect, misleading or has omissions
- Net zero plans are challenged
- A credible reduction plan and SBTi compliance preferred by investors
- Finance team runs the reporting process

The Enterprise Sustainability Data Platform

Implement Sustainability Throughout Your Business

Enterprise Sustainability Data

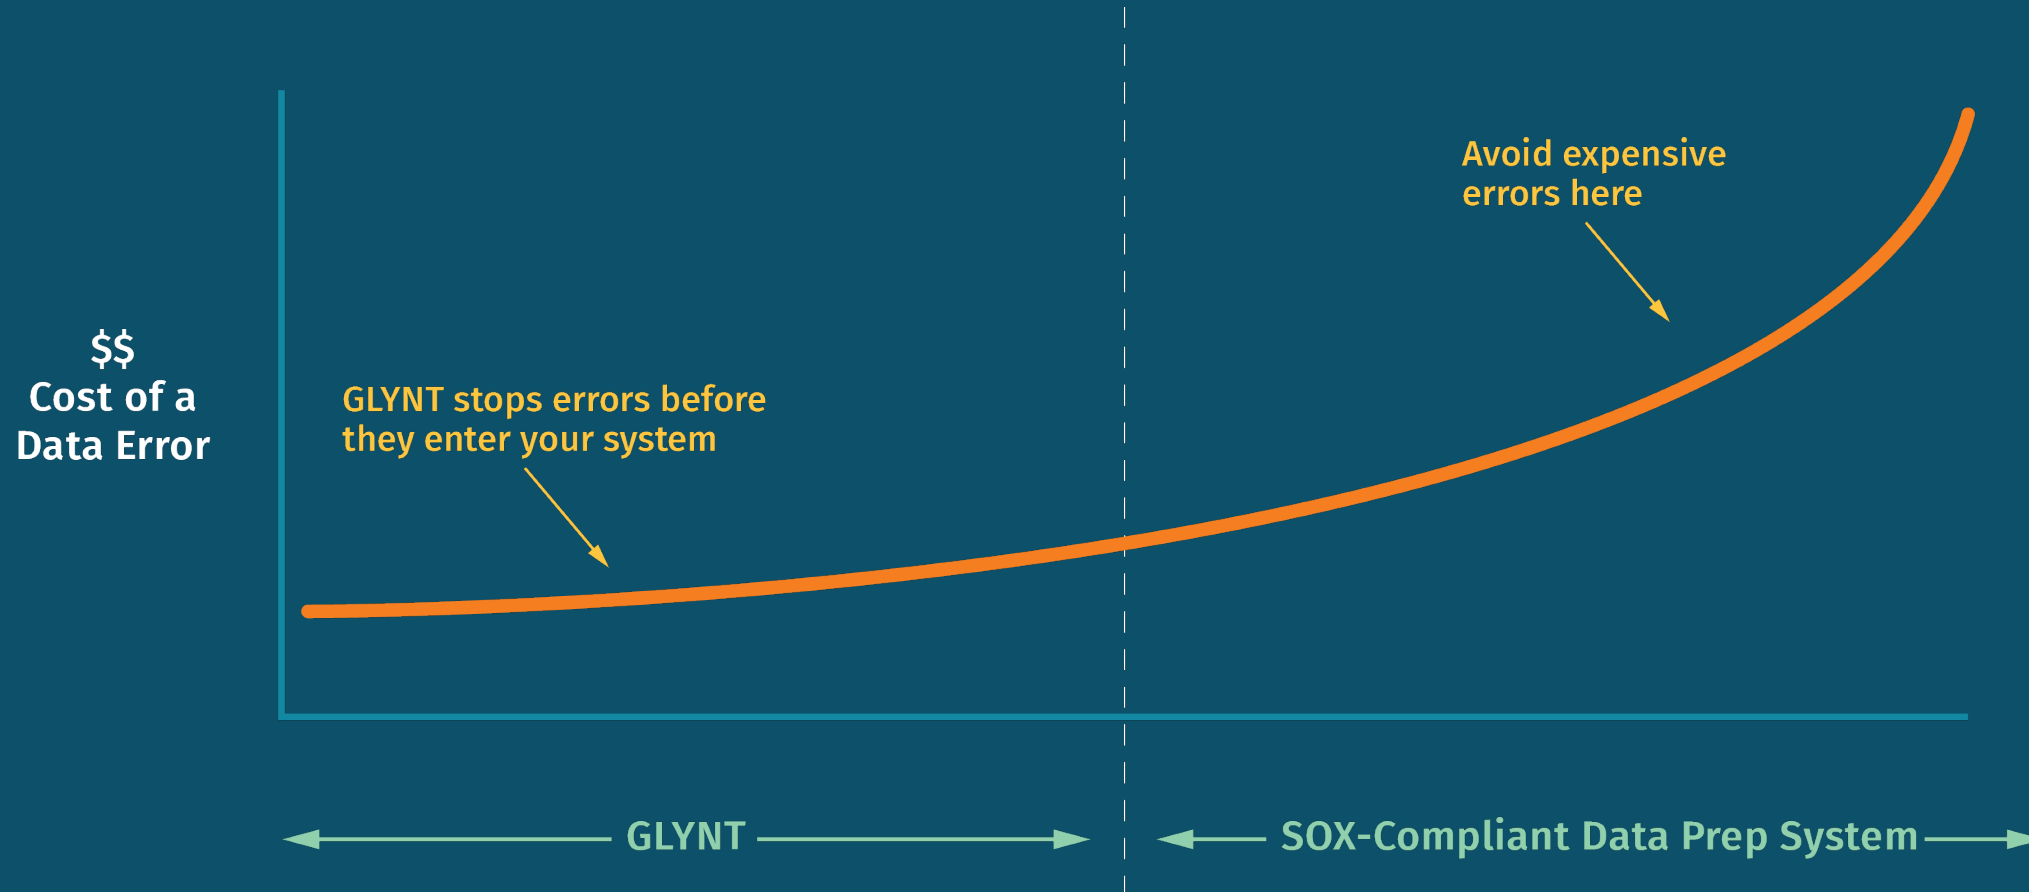

The Company We Keep

GLYNT partners with technology, consulting and advisory firms to speed your sustainability solutions

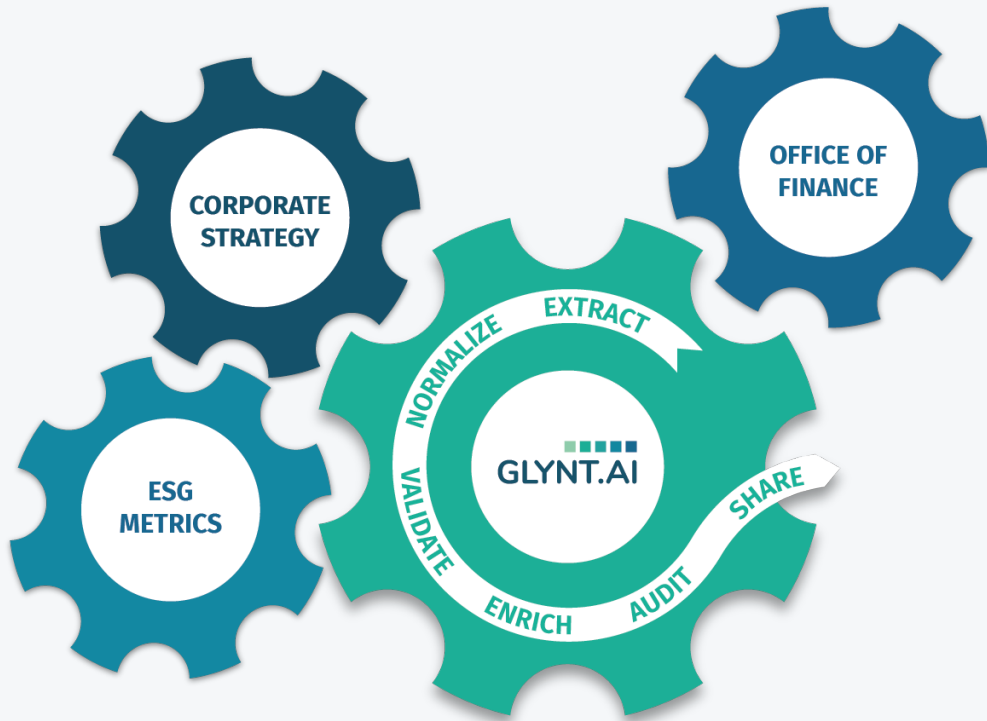

Reduce Reporting and Compliance Risk

Late-stage errors are costly. Use verifiable, audit-ready data from GLYNT

Use Your Existing Financial and Accounting Software

GLYNT data is prepared for easy integration into existing systems, making it easy to engage your current team and to streamline financial-sustainability planning

A Fast Path to Automated Data Flows

1.
“Taste of GLYNT”
A live sample of your data

2.
Risk Free Trial
End-to-end data flows for your first sites

3.
Onboarding
Quickly load all your sites into GLYNT

Automated Sustainability Data
Always accurate, always updated

A single data stream for all global sites

OR Contract with GLYNT

GLYNT Makes It Easy

We have solutions for those frustrating wrinkles in sustainability data

**Automated Utility Bill
Capture from Data Sites**
