

## Modern Intranet

Designing a Modern Intranet is accomplished through a workshop lead engagement beginning with Discovery and Design. Using out of the box capabilities, this phase focuses on requirements gathering and capability usage. Planet aides the envisioning process through “art of the possible” demonstrations showcasing Office 365’s capabilities.

Enablement configures policies and settings to publish the Intranet using Viva Connections, applicable tenant configurations and the initial deployment of an intranet.

Knowledge transfer is carried out through the entire engagement; however, the engagement wraps up with providing knowledge transfer to administrators and content owners.
