

## Summary

GOBI Technologies delivers a focused data governance engagement that helps organizations establish trust, visibility, and compliance across their data estate using Microsoft Purview. This engagement accelerates modern governance adoption by transforming governance into a strategic business capability.

Through structured assessment and alignment, we evaluate governance maturity across people, process, and technology, identifying gaps in data discovery, classification, lineage, and regulatory coverage. High-impact governance use cases, and regulatory requirements are prioritized to focus efforts where they deliver the most value.

The engagement results in a configured and operational Microsoft Purview environment, with automated scanning, classification, lineage, and governance workflows. With trained stakeholders, dashboards, and a scalable operating model, organizations can sustain compliance and scale governance with confidence.

## Deliverables

- **Governance Maturity & Gap Assessment:** Documented evaluation of current governance posture across people, process, and technology, including identified gaps and risks.
- **Microsoft Purview Configuration & Deployment:** Configured Microsoft Purview environment with collections, connected data sources, and automated scanning enabled.
- **Data Classification & Lineage Setup:** Implemented automated data classification, sensitivity labeling, and end-to-end data lineage for prioritized data sources.
- **Governance Policies & Compliance Mapping:** Defined governance policies, workflows, and regulatory mappings aligned to GDPR, CCPA, HIPAA, and organizational requirements.
- **Enablement & Governance Roadmap:** Stakeholder training, dashboards, operational documentation, and a phased roadmap to scale and mature the governance program.

### Assessment Focus:

- Governance Maturity & Operating Model
- Data Discovery, Classification & Lineage
- Compliance & Policy Enforcement

### Benefits

**End-to-End Data Visibility:** Gain clear visibility into data assets, lineage, and ownership across the organization to improve trust and transparency.

**Stronger Compliance & Risk Management:** Establish governance controls aligned to regulatory requirements, reducing audit risk and compliance effort.

**Automated Governance at Scale:** Leverage automated discovery, classification, and policy enforcement to minimize manual governance overhead.

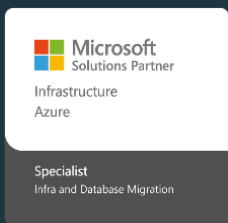

**Improved Data Trust & Quality:** Enable better decision-making by improving confidence in data accuracy, consistency, and stewardship.

**Faster Compliance & Audit Readiness:** Accelerate audit preparation with built-in reporting, lineage, and policy evidence across governed data sources.

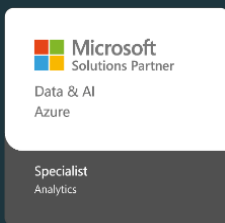

**Empowered Data Stakeholders:** Enable data owners and stewards with tools, training, and dashboards to manage data responsibly and consistently.

## Why partner with GOBI for your Microsoft cloud needs

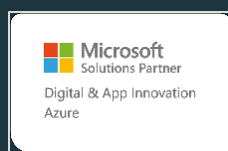

GOBI Technologies is a trusted Microsoft Cloud Partner helping organizations turn technology into measurable business results.
